## How Best to Order and Remit.

[^0]About Packing and Shipping and no charge made. We makeno charge for packing excepting for cloth bags, and no charge for cartage or Celivery of goods to any shipping office in New York City.

Safe arrival assured. We guarantee the safe arrival of all planta sent by express. Should anything be injured in transit, notify us at once and send us a list of what has been damaged, so that we can replace them without delay. Butwhen they arrive in good condition, and if from inattention or other causes they fail, we cannot replace tbem. Plants sent other than by express are entirely at the risk of the purchaser.

Reduced Express Rates. We have secured for our customers from the rallroad express companles a special rate on plantsfrom New York, which is twenty per cent. less than regular merchandise rates.

## HENDERSON'S SUPERIOR

The term "Bulbs," as popularly understood, designates a class of flowering and ornamental-leaved plants in their dormant condition, the flowers, foliage and roots having completed their growth, ripened off and died away, leaving a thickened, fleshy, bulbous root, tuber, corm, rhizome or pip, as the various types of bulbs are botanically named, but in all of which there were formed after flowering and before maturity, a bud or buds containing new sets of flowers, stems, leaves, etc., which are protected and sustained within the succulent bulb by the reserve food and energy collected and stored therein by the plant before rlpening for its successors' requirements during the next growing and flowering period. It is during this dormant state of rest, lasting, approximately, for from three to six months, that bulbs are taken out of the ground-sold, shipped and replanted, like so many potatoesarter hich, conditions being congenial, the inciplent plan and fowers develop with as much perfection as if the bulb had remained in its original environment.

## Bulbous Flowering Plants (Bulbs) produce remarkably beauti-

 ful flowers, unsurpassed in many varieties by any other plants in the floral kingdom, and, besides, many of them are delightfully fragrant There is a peculiar charm in growing bulbous plants; they comprise such an endless variety in babit, form, size, color, and are adaptablefor so many purposes; many of them flower equally well under either gar den or house culture, and after their beauty fades they hide away, or may be removed, until the proper time arrives for them to again burst forth with a new life of beauty, verdure and fragrance. In the interval their positions may be occupied hy other seasonable flowering plants. Among other merits of bulbs is the certainty and perfection with which they bloom and their ease of culture.Hardy Bulbs for Open Ground Planting.-A great many kinds of bulbs are hardy enough to withstand our severe Northern winters. Most of the suitable sorts should be planted in the fall, and they Sill fower the Chionodoxas, Scillas.Crocus, Aconites, Bulbocodiums Snowdrops, Chionodoxas, Scillas, Crocus, Aconites, Bulbocodiums,
etc., which are followed in April with Hyacinths, Tulips, Daffodils, and hosts of other bulbous beauties. In May appear late Tulips, late Narcissus, Lily-of-the-vallev, Bleeding Hearts, etc. Again, followed in succession until frost, notably with Pronias, Iris, Hemerocallis, Lilies, Montbretias, Tritomas, etc.

For Geometrical or "Design" Bedding.-The bulbs best adapted are Dutch Hyacinths and Tulips, and while the dainty blendings and variegations of colors of many varieties of these are very beautiful, yet in this style of bedding the individualities are lost and the effect is apt to be a jumble. The happiest effects are produced by planting solid brightcolors in contrast, and in ordering the varieties it is important to select those that will bioom at the same timeand are of proper heights.

The Mixed Flower Garden and Herbaceous Border are favorite places for growing most hardy bulbs, and where they seem to thrive and give the most pleasure. They should be planted here and there in little colonies ansong the hardy plants and shrubs, whose sombre winter browns and dull greens make a most effective setting when studded in the early spring with the brilliantly colored and fragrant bulbous blossoms. Besides from the borderone does not hesitate to gather flowers daily for the house, for fear of spofling the effect, as would be the case from design beds. And besides, "bulbs seem to do better and last longer in a border" as a ladycustomerexpressed it, and this is partlally true, and thus nccounted for: The flowers are freely cut In bud or approaching their prime, which is the best possible time for the future benefit of the bulb, for the efforts of bulbs to seed are weakening; in fact, a Hyacinth that matures seeds virtually destroys its bulb. Furthermore, in an herbaceous border bulbs are not disturbed, the follage remains uninjured until ripe, thus fulfilling its duty assigned by nature of recharging the bulb with new flowers, follage and energy for the next senson's display, whereas in beds for temporary effect bulbs are not often allowed to mature properly, the bed being required too soon for other seasonable plauts.

Bold, Isolated Clumps of Tall-growing Bulbous Plants make a brilliant show planted on the lawn in a position not too prominent nor toe near, the object desired belng a large mass of one color, in striking contrast to the wurrounding green grass and trees. For effects of thls kind only one varlety whould be used in a bed. Those montsuitable are Indicated In the Index by an (U)

Bulbs Right in the Sod on the Lawn present a pleasing picture when in bloom in the early spring. They should be planted in a "hit-and-miss" fashion, an irregular group in one place, scattered individuals over there, as one would find wild flowers. Of course, on closely-clipped lawns, only very early spring-flowering bulbs can be used, those that flower, ripen and die down before it is necessary to use the mower. Then the summersuriace of the lawn will be as smooth and green as if no sleeping bulbous beauties were beneath it waiting for their awakening the next spring. The bulbs may be planted with a dibble when the sod is moist and soft after fall rains, but it is better to cut the sod, turn it back, plant the bulbs and press the sod in place. Suitable sorts are indicated in the index by an (7)

Naturalizing" Hardy Bulbs in parks, semi-wild, outlying grounds, etc., is coming much in vogue, and is a happy style of simulating nature. Such bulbs should be used as can be planted in quantity, from a dozen to a hundred of a kind in a patch. Fortunately, among bulbous plants, we have many that are hardy, thrive and increase in such rough, neglected, picturesque places even better than in the prim garden. Those suitable are indicated in the index by an $(\Omega)$

## BULBS FOR FLOWERING IN THE HOUSE AND GREENHOUSE.

There is no Class of plants that gives more satisfaction for this purpose than bulbous plants (bulbs), and with so little skill gives such magnificent results. Perhaps the most important class of adl bulbs for winter flowering and forcing are certain hardy and half-hardy kinds; they are the most easily managed of all, and need occupy no space in the window or greenhouse excepting when in bud and bloom. Under suitable treatment they flower with great certainty, and their flowering period may be hastened (forced) or retarded at pleasure so an to "bring them in" for certain occasions, or to give a continuous suc-
cession of bloom. There is a great variety of kinds of bulbs to select from for this purpose. See sorts marked (*) in index.

## FLOWERING BULBS IN GLASSES, BOWLS, UNIQUE POTS, ETC.

There are several curious and pretty methods of flowering certain bulbs besides in ordinary pots and pans. One of the most successful and interesting are Hyacinth bulbs in glasses of water. Use early flowering single varieties only. We supply special "Hyacinth Glasses; for the purpose (see page 70 ). These are simply filled with fresh pure water; a lump of charcoal thrown in absorbs impurities, but is not absolutely necessary. The bulb sets in a cup-shaped receptacle on top of the glass. In filling, the water should not quite touch the bottom of the bulb. Place in a cool, dark, airy place untll the roots have reached the bottom of the glass, which should be in about six weeks' time. Do not place them in a close, warm closet; they must have fresh alr. As the water evaporates fill up the glasses and change the water entirely when needed to keep it sweet and clear. After rooting, place the glasses in a light storeroom where the temperature averages about 50 degrees until the stems and follage have developed, then remove to a warm sunny window for flowers to open.

There are other kinds of bulbs that do equally well when rooted in water, providing the largest healthy bulbe are chosen. Notably, Amaryllis formosissima. Narclssus Horsfieldi and Golden Spur, Polyanthus Narcissus, Grand Monarque and Gloriosa, large bulbs of Roman Hyacinths, Early Single Tulips and Mammoth Yellow Crocus, etc. The so-called "Chinese Sacred Lily," a variety of Polyanthus Narcissue. grows and flowers luxuriantly in bowls of water, provided they are not placed In a dry furnace-heated room, which will canse the buds to blast before opening. Sufficient pebbles or shells should surround the bulbs to prevent them from toppling over

Crocus, Roman Hyacintha and Lily of the Valley pips are very pretty when nicely flowered in columnary hedgehog or beehive-shaped pots with holes through them (see page 70 ). A bulb is placed In frons of each hole with the crown of the bulb in it; the pot is then filled in with the soll through the large opening in the bottom, moss belng pressed in last to hold the contents in place. After which the pote are put outelde for the bulbs to root, as explained under "Cultura Jnstructions for Winter Flowering Bulbs," on page 3 .

# $\mathrm{C}^{\text {clitural. }}$ <br> INSTRUCTIONS <br> FOR <br> HARDY BULBS <br> OPEN GROUND. 

The soll for most bardy bulbs should be sandy lorm. If it is stiff clay mix in sand and leaf mold. The texture of the soll should be such that it will not retain stagnant water. Well-rotted stable manure should be dug in deeply and should be placed where the long feeding roots can get at it and yet not come in contact with the bulbs. This is easily accomplished, and pays for the extra trouble if six inches of the top soil is first removed. Then apply the manure and dig it in thoroughly ; level off ; then put on an inch of sand ; set the bulbs on it ; then replace the top soil. Bulbs planted in this manner can be placed in their exact positions, and being of an even depth will flower more uniformly. The sand allows the water to drain away from the bulbs, an advantage in design bedding, and prevents manure from touching them, either of which may cause dormant bulbs to decay.

Where it is impracticable to prepare the beds as just advised then it is safer to use bone meal in place of stable manure. Most bulbs like rich food if properly applied, and although their flowers were formed the previous season, yet their development, size, luxuriance and brilliancy this season depend largely upon the nutrition the roots are consuming. Liberal applications of manure water when the bulbs are in bud often produce magnificent results.

The proper depth to plant bulbs: it is a common fault to plant too shallow Hardy bulbs throw out their roots during the fall and early winter, and if planted too near the surface the freezing, thawing and heaving of the upper crust of the soil in mild winters often cause the bulbs to break from their
roots and produce only inferior flowers in consequence. Lilies should be planted 8 to 12 inches deep; Hyacinths, Tulips, Narcissus and similar large bulbs from 5 to 6 inches deep; Crocus, Scillas and similar bulbs 3 to 4 inches deep. When the weather is cold enough to freeze a crust on the soll then cover the beds with leaves, straw or marsh hay to a depth of from 4 to 6 inches. This protects not only from severe freezing, but from equally injurious unseasonable thaws. Do not put this covering on too early, for the warmth might cause the leaves and flowers in the bulbs to start, and afterward to be injured from freezing. Remove the covering in the spring gradually

The proper time to plant hardy bulbs in the open ground is from \& to $G$ weeks before regular freezing nights, cool weather being necessary to deter top growth, which is liable to start after 4 to 6 weeks of root development. This brings the planting season for such hardy bulbs as Hyacinths, Tulips, Narclssus, etc., in September in latitude of Maine, Ontario, Wisconsin, ete; in latitude of New Jersey, Pennsylvania, Ohio, etc., plant in October ; in latitude of Virginia, Kentucky, Missouri, etc., November is early enough. South of that do not plant before December, unless you wish to risk the occasional freezing weather in January and February, which usually catches early-planted bulbs in full wealth of foliage and bud, destroying them, though in this section very earlyflowering bulbs, such as Roman Hyacinths, Duc Van Thol Tullps, Paper White Narcissus, etc., if planted in September, will usually be through flowering before freezing weather.

# C <br> ULTURAL <br> INSTRUCTIONS 

## Winter=flowering

 Bulbs.
#### Abstract

One of the most important essentials-we might say the secret of suecess in flowering bulbs in the house or greenhouse-is perfect root development before the tops commence to grow, To aid the uninitiated in this important matter, we will illustrate: When hardy bulbs are planted in the open ground in Northern States, by the time the bulbs show signs of growth the weather above them is cool or cold, the ground beneath them is warmer, the conditions are them is cool or cold, the ground beneath them is warmer, the conditions are congenial for rout action and deterrent to top growth, results perfection in development of such flowers as the bulbs contained. A bulb does not seem to care which end starts into growth first, and when it is not under natural condicare which end starts into growth nilly chooses the wrong end, the top, so when wegrow them under artificial condifions, to be successful, we must overcome their unfortunate ten dency and make them produce roota first. The failures to do this are responsible for nine-tenths of the disappointments

When hardy bulbs are to be grown in pota or winter blooming the bulbs should be potted as soon as they are procurable, between Augast and November.

The soil used shouid be rich loam: no fresh manure can be used, though if thoroughly rotted, some may be pulverized and worked through, but it is safer to use in place pure bone meal, one part to firty or soil. If the soliss stiff and heavy mix it with sand and leat mold or peat. The size of pots required depends similar while they can go individually in a four-inch pot, yet it is better to put three or more bulbs of one variety in a larger pot, as the soll retains a more even temperature and moisture. For this reason some people prefer earthen bulb pans, which come in various sizes, from eight to eighteen inches in diameter. In potting, place a little broken pottery or lumps of charcoal in the bottom for drainage, then fill the pot with soil and shake it down, but do not pack it ; neither must the bulb be pressed or screwed into the soll, which packs the soll under it go when the roots start they often raise the bulb out of the pot

Whare more than one bulb is planted in the same pot. pan or box, if they are not all of one variety, care should be used in selecting different varieties that will flower at the Rame time. An early-flowering Duc Van Thol Tuliy and a double Tournesol would flower a month apart under same treatment. Some varieties of Hyacinths, Narcissus and varieties of most species of bulbs vary greatly in time of blooming, which, of course, would spoli the effect. The tops of the bulbs excepting cifral are kept about even with the top of the soll. Do not water them unless the 8011 is very dry, for bulbs in a dorman soribed, they ghould then be placed in a cold frame or cold pit to root. This is the moet important detail in flowering bulbs under artiflcial conditions Cover the pots, boxes or pans with four inches of sand, ashes, rotted leaves, tanbark or simflar substance, and do not put the sashes on until freexing weather, and even then remove the sash on pleasant days. Where no cold frames or pits are avall sble, the pots may be covered as advised in a cuol cellar ; it is preferable, how over, to sink then rizht out in the open ground. The writer never has finer flowers on hardy buibs than when treated thus: A trench is dug a foot deep in the garden where water will not settle on it and it is protected from the north and west cold. Thrce inches of coal ashes is first placed in the trench to allow drainage and keep the worms out. The pots are then placed on the asues the

earth is filled in, working it among the pots, fllling up the trench, rounding over. No further attention is then required. Everything is congenial to perfect root development, while it is cool enough above to check top growth. When the ing of about four inches of ough a crust on the sonven an taw is put over Some early bulbs, such as Roman Hyacinths, Paper White Narcissus, Due Van Thol Tulips, etc., will root sufficiently in five or slx weeks to be taken up for firs flowers, which should be out by Christmas or earlier, but it is safer to aflow all
bulbs not less than eight weeks for rooting. Every two weeks after the flrst removal of pots, or as needed, further relays of rooted bulbs may be taken out for a continuous display of bloom.

When the pots of hardy bulbs have been taken up place them in a cool greenhouse or cool, light storeroom where not over fifty degrees, which temperature will sllow the flower stems and foliage to grow, and at the same time
prevent the opening of the flowers until the stems have attained their proper they are wanted to flower Buibs treated in this manner will produce perfeet they are yanted to flower. Bulbs treated in this manner will produce perfect is 40 degrees for roots, 50 degrees for foliage and stems, 60 degrees for best flowers, 20 degreeg for quick development, 80 degrees to rush bloom with loss of substance and risk of going blind. The exceptions to the above advice are Liftum ing out roots from the base of the bulbs, usually form roots from the new stem just above the bulb, and the plants and flowers derive muchstrength from these top roots. So, in potting Lily bulbs, it is best to put them down deep enowgh, so
there will be sufficient soil above the bulbs to entice and sustain the stem roots. there will be sufficient soil above the bulbs to entice and sustain
In other respects treat the bulbs after potting as advised above.

Winter-flowerlng Lily of the Valley forms no new roots, but the thick, fleshy, ifbrous old roots should be trimmed at the bottom, leaving thein from two to three inches long. This allows them to absorb the abundant molsture with They flowey should be kupplied while the flowers and foliage are developingand temperature, as they do in soil, but Lily of the Valley, for flowering in the house or greenhouse, does requirefreezing before it can be successfully brought into flower. Without it, many pips will "come blind" or produce malformed spikes, so it is just as well for amateurs to plant their pips an inch or two aparb In pots or Lily pans

Half-Mardy Bulbs for Winter Flowering and Forelng should be treated the same as hardy bulbs, excepting that after potting they whould be placed for rooting where they will not freeze, yet they can go pretty close fo it and be all the better for it. In Northern States a cold frnme or pit or cold greenhoume to root them in is, therefore, simost indispensable

The Culture of Tender Winter and Summer Flowering Bulbn differs from that of hardy and half-hardy sorts in its being necessary to always keep the bulbs of tender sorix, whether dormant or growing, in a warm fituation. Seventy degrees is about an low a temperature as any of them will grow th, athd if 80 degrees or over they usually give better results.

## Henderson's "RAINBOW" Collegtion OF BULBS.

For Winter Flowers in the Conservatory or Window Garden.
This collection is made up of the same choice bulbs that we offer In this Catalogue, and will give an endless amount of bloom throughout the winter. ## HENDERSON'S Special Bedding and Forcing Hyacinths.

THE bulba under this hesuling are of a much larger size than thrian put in ordinary mixtures; In fact, mont of thene arerage as large as those often sent out as "first slze Named" by some dealers. They are of the same age as the first slze Fancy Named Hyacinths offered hy us on pages 6 and 7 , from which they are the second selection. They will produce grand spikes of bloom, and the different sorts, as offered below, all being of ono shade of color and all blooming at one time. render them of great value for forcing or bedding out, especially in dealgas, embling one to fecure the exact color effect dewired, which in a great advantage over mixed reds, mixed blues, etc., at but a milght advance in price.
3 bulbs of one varietys supplied at the doren rate; 25 at the mon rate

Hone knows them to be the most useful and popular of hardy bulbs, and universal favorites in the most extended application of the word. They are not only largely grown for forcing into flower during the dull, cheerless months of winter and early spring, but they are equally desirable for planting in beds or in the garden border. Hyacinths grown in glasses are elegant and suitable ornaments for the parlor or sitting-room, and can be flowered in this way with very little trouble. The single varieties are more generally used for this purpose.

The varieties prefixed * are the earliest flowering. Our Named Hyacinth bulbs are the largest selected bulbs, not the second size so often sent out as the best at a cheaper price.

## HENDERSON'S

All varieties offered on pages 6 and 7 are sold at the uniform price of Delivered free in the U. S. PRICES or if buyer pays transit

## JUST A FEW OFTHE MANY Words of Praise

## That Henderson's Hyacinths receive:

"The byacinthe I got from you last Fall were Just grand! I have recefved uulbs from different places, but I am compelled ro suy that yours take the lead. Hhen 1 order bulbs my order goes to Peter Henderson de Co.

Mrs. M. J. HC:MERICHOUSE, Richmond, Ohio.

[^1][^2]

# HYACINTHS grown in glasses are elegant and suitable ornaments for the parlor following assortment which we hare desimnated the © Water Collection " is made np of excentionally beautiful varieties, such as we have found to succeed well when grown it glasses. <br> ing the buibs slould be placed in the glasses as early in the season as possible, keep ing them in a cool, dark airy cellar or similar situatiost and sunniest cool situation that can be had is the best; the water in the glasses should be changed two or three times a week. Fill the glass with water, so the base of the bulb will only touch the water. 

## SINGLES.

Bird of Paradise. Fine rich yellow, large compact
General Pelissier. Rich bright crimson scarlet aplendid spike wery early and a great favorite for forcing, the best early dark red.
King of the Blues. Rich dark blue, the finest of the deep blues, extra large, well furnished, broad spike with large bells, erect and extra fine.
Lord Derby. Pale porcelain blue, grand large broad spiike, rplendid.
Moremo. Beautiful hright pink, large waxy bells. Mr. Plimsoll. Ivory white tinted with rosy blush. grand spike of large bells.

## DOUBLES.

## Florence Nightingale.

 Pure glistening white.large double bells and and large truss, extra fine, the best of this color and
Pink Lord Wellington. One of the finest double blush pinks, large spike and bells, very early. Murillo. Beautiful color, immense bells, azure blue, shaded darker, larga strong spike, vers early Othello. Deep black purple, large bells, very early

## Henderson's "Water Collection" of Hyacinths.

20 c . each, $\$ 2.00$ doz.; the set of itwelve for $\$ 2.00$. $\mid 18 \mathrm{C}$. each, $\$ 1.75$ doz.; the set of twelve for $\$ 1.75$.

AN assortment of masnificent varieties, of distinct and superb shadea nf color, all strong-growing, producinglarme and fullspikes of bloom, and sure to give the greatest satigfaction for winter flowering in the conservatory or window garden,

Fil a 5 or 6 inch pot rather loosely to the brim with soll comnosed of loam, leaf mold and sand, fertilized with bone meal : place the bulb down so that it appears about eren with the toy of the soll. The pots should then be plunged in a cold frame orin the garden, the top of the pota fully 4 inches helow the surface of the ground, then cover with soll and learea or litter to prevent freezing: this will encourage a atronggrowth of roots before the top starts. It must not be forgotten that a strong derelopment of root can only be had at a low temperature, say from 40 to 50 degrees, and ans attempt to force them to make ronts quicker by placing them in a high temperature will certainly enfeeble the flower. They may be removed in succeaston as required, after slx to elght weeks' time, to a cool room for flowering

SINGLES.
 tiful large broad bells, large compact spike.
Cardinal Wiseman. Naintr himsh pink throumh out, large broad truse

generally are in full flush of bloom about "Decoration Day." They differ from the Early Single Tulips by their taller growth and later bloom; planted in conjunc tion with the early-flowering Tulips, a gorgeous display of bloom can be enjoyed until late in May

## PARROT or DRAGON TULIPS.

These belong to the late or May-flowering Tulfips, and have immense, attractive flowers of singularand picturesque forms and brilliant and varied colors. The petals are curiously fringed or cut and the form of the flower, especially before it opens, resembles the neck of a Parrot. They form extravagantly showy fower beds, an endless variety of form and color, and should be grown in every flower garden in quantities.

## New "D arwin" Tulips.

[^3]
 and markings, and, being double, the flowers last much longer in bloom than single varieties, and, in cunsequence, when singles and doubles are planted in conjuaction the "time of the Tulips" is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the gardeu, and for mingling in clamps of half a dozen or more around the edges of shrubbery. They are robust growers and exceedingly effective. The early sorts (those indicated by an " $A$ " or " $B$ ") do splendidly when grown'in pots for winter blooming, but must be forced much slower than Single Early Tulips, by keeping them cooler

The letters following the varieties indicate their earliness ; those marked "A" flower together and are the earliest; those marked " $B$ " follow, etc. The figures indicate the average height in inches.

## Dovile enrly-fiowerilig Tulps.

Agnes. B7. Bright 'fiery scarlet, large

mperor. One of the finest Daffodils in cultivation, entire flower of the richest yellow, trumpet of immense size, and the petals of the perianth are so broad they overlap and measure $31 / 2$ inches across. Grand for cutting.
GoldenSpur. One of the grandest Daffodils, with extra large, bold, rich yellow flowers, foliage very broad and striking. It is of unusually robust habit, and unsurpassed for gardens, pots or forcing. Early and extremely free flowering. (See cut.
Maximus or Hale's Beaten Gold. One of the largest and most beautiful of this class. Very large flower of rich, deep golden yellow. Remarkable for an elegantly twisted perianth. Trumpet deep golden, large, well flanged and deeply fluted. The darkest and richest yellow of all Daffodils. (See cut on opposite page.)
Eenry Irving. A magnificent flower, with beautlfully frilled trumpet, nearly two inches wide at the mouth, of rich golden yellow color. The petals of the perianth are very wide, overlapping, color bright yellow. A most perfect flower; received a first-class certificate
Obvallarius. Thefamous "Tenby Daffodil." Elegantly formed medium-sized flower of rich yellow. One of the earliest and excellent for forcing. One of the most periect flowers in this family, and we recommend it highly for any purpose.
Rugilobus. A very free bloomer-broad petaled flower 3 inches across. of pale yellow, large trumpet of golden yellow, a beautiful variety
Trumpet Major. Flower large and almost of a uniform deep golden. Highly prized as an early forcing sort and largely planted for outside bedding
Mized Large Trumpet Narcissus. Plant itberally of these for cutting purposes and naturalizing

## LARGE TRUMPET

## Narcissus.

## LARGE TRUMPET NARGISSUS.

## WHITE GND YELLOW VABIETIES.

Empress. A magnificent, large variety, bold and erect. A rare beauty. Some give this the palm of being the best of the two-colored trumpets. Perianth white and of great substance, trumpet rich vellow. (See cut on preceding page.)
Grandee Flowers large, with broad white perianth, the petals of which are wide and overlapping, tube a magnificent yellow, beautifully imbricated; a flower of great'substance and grand for cutting
Horsefieldi. The "Queen of the Datfodils." Very large flowers of pure white, with rich yellow trumpet. Very stately and beautiful, and one of the most elegant for ladies corsage wear. The flowers are the largest of this class, very early and freeblooming, a grand cut flower, and eagerly sought after as one of the finest. (See cut.).
Princeps. Very early. This is one of the most popular winter-flowering and forcing varietiles grown. Flowers large, perianth sulphur, an immense rich yellow trumpet..;
Scoticus. The "Scotch Garland Flower," or "Large-flowering Lent Lilv." Large flowers of creamy white, bright yellow trumpet, elegantly flanged and serrated....
Mixed Iarge Trumpet Narcissus. For growing in masses in flower borders and grass, or to naturalize by woodland walks, in woods and shrubbery, and by streams and lakes. We strongly recommend them, all being vigorous, free-growing varieties. We offer them at an exceptionally low price to encourage liberal plantings. They are perfectly hardy and will flourish and increase.

## $\mathfrak{H}$ endersons Mixed Narcissus or Daffodils.

We offer these at exceptionally low prices to Dolivered free encourage liberal plantings. They are very suit- in U. S. ablefor crowing in masses for garden decoration and are grand for cutting and are particulauly adapted for mixed horders, " natwalizing" in Each. Doz. shrubbery by woodland walks, in wonds by streams and lakes and semi-wild outlying grounds. They are perfectly hardy, and will flourish and increase. The mixtures include many beautiful varieties.

Mixed Large Trumpet Narcissus.

## MIXED NAECISSUS.

Plant liberally of these, so you can have plenty to cutfor bouquets. They are cheap.

## Double Narcissus

 * or ** Daffodils.
# CROCUS "The .. .... Harbingers of Spring." 

THE CROCUS is one of the earliest flowers of spring, and occupies a prominent place in every garden. When planted as an edging in triple lines of one or more colors, the effect is striking. No spring display surpasses that of Crocus; the broad wavy bands of goldenyellow, striped, purple, or of pure white, when they expand their blossoms in February and March, are incomparable. In lawns and pleasure parks, planted in the grass, the Crocus is extremely effective. They are easily planted indiscriminately in the turf with the aid of a dibberafter fall rains have made the sod moist. The flowers and foliage are gone before the lawn needs mowing, so they do not interfere with the summer beauty of the lawn. For several years past Crocus, Snowdrops, Daffodils, etc., have been planted in our parks and lawns, in wild places, woodland walks, etc., to the great delight of visitors and enhanced decoration of the parks. In one of the parks thousands of Crocus were used in the grass, and the effect was matchless.

## Mixed Crocus

COLORS SEPARATE.

## COLCHICUM, The Autumin-Flowering Crocus.

[^4]L
 May, and with the various species maintain a continuous and unbroken succession of bloom until autumn. No class of plants, capable of being eultivated out-of-doors, possesses so many charms; their stately habit, rich aud varied colored flowers, often deliciously fragrant, and easy culture, render them so distinct from all other hardy plants that no collection, however select, should

## TME

## True Bermuda EASTER LILY,

## -

This Peerless Lily is the greatest acquisition to floriculture made in many years. The remarkably short time required to bring them intoflower, and the certainty to produce a profusion of bloom, and also the ease with which they can be made to flower at any desired period, such as Christmas, Easter and other special occasions, render them invaluable

As a Garden Iily it is of great beauty, being entirely hardy, excepting in northern climates, where it requires a protection of leaves or litter to the depth of 5 or 6 inches.

Full Cultural Instructions, telling how to force them into flower for Christmas or Easter-the treatment after fowering-about planting in the open garden, etc., Sent Free to every purchaser from this catalogue.
The Flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they are open, or partially open, they can be kept for two weeks.
A. Short Time only is Required to bring them into Bloom. Bulbs potted in August can be had in flower in November, if desired.

A Succession of Bloom can be kept up from November to May by bringing the pots of buibs in from cold frames at intervals throughout the winter.

The Quantity of Bloom Produced is Marvelous; the average production of bulbs 5 to 7 inches incircumference, even when forced, is from 5 to 8 flowers, and of bulbs 7 to 9 inches, 8 to 12 flowers and, if desired, a second crop of flowers, frequently equal to the first, can be secured the same season by drying the plants off after blooming for a time and then again starting them.

Blooming Plants in Pots form typical Easter offeringe and presents for decoration of the window, table, house or church. Nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every winter for this purpose.

THE

# True Bermuda EASTER LILY 

Our Bulbs are Larger, Healthier and Better than those usually soldfor the reason that no expense is spared in manuring and cultivating. Experience having shown us that bulbs so treated are incomparably superior to bulbs grown on impoverished and unfertilized land year after year, which constitutionally weakens the bulbs and they give results accordingly. This is the general practice-especially among those who endeavor to grow cheaplyto enable them to undersell.

## What is Thought of Henderson's Bermuda Faster Lily Bulbs:

" 1 have been growing vour Harrisii bulbs for several years. Last season $I$ divided my order, placing one-half with you and the other halfwith anotherprominent seedsman. Yours were the true Bermuda Harrisil while the others were badly mixed with a worthless variety which grew to enormous height with a very small fower. Your half were all of an even size with flowers of excellent quality. I had the honor of having the finest lilies in Pittsburgh from your bulbs. There were but few of your plants diseased-probably 50 in the whole batch of 6,000 bulbs. You will have my full order next season."

Yours traly,
WM, F. LAUCH, Florist Carrick, Pa.
"The stock I got from sou is doing murh better than any I have had in the last three years, which were purchased elsewhere. Last year my bulbs turned out fully 40 per cent. worthless; the year before 30 per cent. and the jear before that 20 per cent., and I changed purchasing face on that account every year. This season I got my bulbs from you, and I am very much pleased with them. They are as fine a lot of plants as any one could wish to see. Trusting you may be able to keep your stock as free from disease in the future as this lot has turbed out, Iremain,

Yours very respectfully,
GEO. W. EMMANS, Florist, Newton, N. J."

## HFE BEST SIKFS TO USE.

\{The best for "Earliest" forcing and particularly for cutting with long stems. Bulbs should produce from 5 to 8 ftowers.
\{ This is the most popular size to grow aspot plants for decoration and \{ equally as valuable for cutting. Bulbs should.produce 8 to 12 fowers.
These are usually grown for specimens in pots, for exhibition and decoration. Each bulb should produce from 12 to 18 flowers.

ACHIDIENES.

AGAPANTHES

ALLIUM HERMITTI GRANDIFLORUM

AMORPHOPGALLUS.

amertcan cotrblip or dodecatheon.

ACHIMENES. These are splendid and profuse summeror warm window parden. flowerg of many charming colory ranging through all shades from white to crimson, including many beautifully spotted. (See cut.) (Ready in November.)
Magnet. Blue and violet
Feriana. Bright scarlet..
Pulchella. Blue and white
Iady Iittleton. Dark violet and crimson.
Mrs. Brunow. Violet blue
Elegans. Vermilion
he above 6 named Achimenes, 1 bulb each, $50 \mathrm{c} . ; 3$ each, $\$ 1.25$. Mixed Varieties.
ACAPANTHUS The Great African Lily. These greenhouse. Foliage luxrpiazzas, or for the decoration of the clusters of 20 to 30 , and measure fully a foot across. The flower stalks frequently attain a height of three feet-the flowers opening in succession for a long period during the summer and autumn. (See cut.) (Ready in November.)
Umbellatus. The old favorite; flowers bright blue.
Mooreanus. Much dwarier than the type, very robust, shorter, stiffer foliage, hardier and extremely free flowering, large umbels of dark blue flowers.
ALIUUM. Most beautiful for pot culture or garden decoration; of the easiest culture. (See cut.)
Azureum. Truly beautiful, either for pot or garden culture, being quite hardy, flowers deep azure blue, borne in large umbels; height, 1 to 2 feet.
Aureum. (Molly or Golden Allium.) One of our most showy border plants, periectly hardy, bearing large umbels of golden yellow flowers in June. A very old favorite, and fine for naturalizing in the garden, where it forms large clumps; height, 1 foot...
Hermitti Grandiforum. A splendid winter-flowering and forcing variety; the flowers last a long time after being cut. The flowers are large, of immaculate whiteuess and continue to bloom from December to the end of April. (See cut.)
Neapolitanum. Another excellent variety for winter flowering, now extensively forced by florists for cut flowers, being of pure white, with green stamens, borne in large loose umbels, height, 15 to 18 inches
Ostrowskianum, A beautiful new species from Asia Minor, with large heads of beautiful rose-colored flowers, on stalks 2 feet high; very early, free-tlowering and hardy
ALSTROMERIA Peruvian Iilies. Tuberous-lily-like flowers of great benoted plants with beautiful, large, summer; thers of during the and lasti they are splendid for cutting, being of much substance either pot culture or for planting out in frames. Very robust and abundant blooming varieties. Colors: crimson, rose, yellow, purple, etc., shaded aud marked, 2 to 4 feet. (See cut.) mixed Colors. (Ready in November.).............................................
AMERICAN COWSLIP. Dodecatheon. Nathat deserve extensive cultivation; exceedingly effective dwarf plantsfor shady sheltered situation. The pretty Cyclamen-shaped flowers are borne on stems 12 to 16 inches high in elegant umbels. In addition to their value outside they may beemployed for the decoration of greenhouses or conservatories, if cool, or they can be grown in cold frames and brought inside for flowering. Hendersonii. Deep rose-colored flowers. (See cut.). Clevelandi Alba. A new pure white; lovely and fine
AMORPHOPHALIUS, Rivieri. A very replant with enormous palm-like folio markable and showy in mereading in the shape of m and a mown and White; a desirable plant for specimens or groups on a lawn, The
flowers are very large, of deep red, and are produced before the leaves appear. It is chiefly grown, however, for the luxuriant tropical effect of the folinge. It should be planted out in May.

AMARYLLIS. Probably the most magnificent and immense flowers, richness of coloring and regal habit are simply incomparable. They throw up spikes from 18 inches to 3 feet high, bearing enormous trumpet-shaped flowers, averaging 6 to 10 inches across, of great substance, some being of rich and glowing colors, others delicately shaded and superbly veined. For pot culture in the window, conservatory or greenhouse, they are well adapted, and when in bloom in the winter and spring months, no flower can approach their beauty.
Johnsoni. (Bermuda Spice Lily.) A very popular variety, wine red, with a white stripe down each petal, an early and abundant bloomer and a specially robust grower. (See cut.)
Aulica Platypetala. (Lily of the Palace.) Flowers large and extremely handsome, glowing erimson, tipped green. Splendid winter bloomer
Defiance. This is a gem, being a sturdy grower, flowering repeatedly during the season. Flowers extraordinarily large, of velvety carmine red, striped and flecked and suffused with white
Vittata Hybrida. These are unamed seedling hybrids, and will produce some new varieties of exceptional beanty. The colorings and markinge are exquisite, the bulbs are very large, and are of sufficient strength and age to produce magnificent flowers during the winter or spring.
Formosissima. (Jacobæan Lily.) A quaintly-shaped, beautiful flower of grand dark scarlet, free blooming; forces well and can be grown in water like Hyacinths; if the bulbs are kept dry during winter, they can be planted in the open ground in the spring and will flower during the summer..
Belladonna Major. (Belladonna Lily.) Autumn-blooming variety of extreme beauty and fragrance, the spikes grow from 2 to 3 feet high, each carrying from 6 to a dozen beautiful flowers, "sweet as lilies," of silvery white, flushed and tipped with rose.
Equestris. (The Barbados Lily.) Bright light scarlet, with a Whitestar-like throat, running out into bars in the centre of the petals; very free bloomer. (See cut.)..
The collection of above 7 named Amaryllis, 1 bulb each, \(\$ 3.00\).
For Amaryllis A tamasco, see "Zephyranthes," page 45. For A, saruiensis, see "Nerine," page 41. For A. Lutea, see "Sternbergia," page 44.
ANOMATHECA. Cruenta. A charming plant for out-of-doors hardy south either pot culture or for blooming ection of a cold frame in cold climateston but requiring the proliant and profuse bloom continued for a long period render them very popular, flowers bright rosy carmine, blotched with crimson, height \(9 / 4\) foot. (See cut.)
ANTHOLYZA.
Very showy and stately with the appearance of Gladiolus. They are hardy south of Washington, and can be grown in cold sections in a cold frame, or they may be planted out in the spring, flowering from July to September; for grouping in beds or shrubberies, their brilliant long tubular flowers and tall spikes of bloom render them very effective, also fine for cut flowers. Mixed Colors.
ARUM. Dractnculus. (Dragon Arum.) Flowers one foot marbled long, purple, red and black blue, stem beautifully grower, leaves handsome, resembling a small palm, a rapid , making a curious and ornamental pot piant.
Cornntum, or Red Calla. A very handsome Arum with red fowers spotted with black; stems curiously mottled green and white; foliage palm-like and very handsome; a showy pot plant for winter decoration
Sanctum, or Black Calla. The plant produces one large flower the shape of a Calla, but from 14 to 18 inches long and 4 inches broad, and of a rich, dark purple color and green underneath. The spathe rising from the centre of the flower is about 10 inches long, velvet-like and quite black. The leaves are large and of a rich green color, and resemble those of the Calla Ethiopica. (See cat.) Large bulbs.

BABIANA. A charming genus with leaves of the darkest bearing showy spikeg of fowers, characterized by their ris and colors or the striking contrast of very distinct hues in the same flower; they vary in color from the richest carmine to the brightest blue, many of them being sweet-scented. As they are not hardy north of Washington, should have the protection of a cold frame. They are very successfully grown in pots. Five or six bulbs in a five-inch pot make lovely and useful specimens. Height, 6 to 9 inches. (See cut.)
Atrocyanea. Deep blue.
Celia. Cream-tinged mauye
Gen'1 Scott. White-tinged violet
Rosea Grandis. Rosy purple.
Villosa. Velvety deep rose
Eubra. Velvety red
The collection of above 6 named varieties, 1 bulb each, \(75 c . ;\); bulbs each, \$2.00.
Mixed Varieties
BECONIAS. Tuberous Rooted. The wonderiul beauty to almost all situations, hans of Begomias and its adaptabinty pot culture and summer garden decoration; they are now being used by thousands for bedding purposes. For this purpose they are unsurpassed, while grown in pots, for house or conservatory decoration, they are simply grand. Their blooms, large and telling, are thrown up in countless profusion in all shades of colors. We offer the following distinct colors (ready in November)
Single, Frect, Iarge Flowering. White, blush, scarlet, rose, yellow, dark red or orange
Single Mixed, Erect Large Flowering
Double, Large Erect Flowering. Red, white, rose or yellow
Double, Jarge Erect Elowering, Mised Colors.
BECONIA CRESTEDD. A very handsome and ed type-the flowers are large and erect, and the centre of the Hower is ornamented with a unique crest like twisted threads, forming a dense miniature forest, giving the flowers a very gay and puzzling appearance. (See cut.)
Red Crested. Begonia erecta grandiflora cristata rubra. Rose Crested.
Yellow Crested. White Crested
rosea
White Crested. " " " 4 alba
The collection of 4 separate colors, 1 bulb each, \(\$ 2.50\)
BESSERA ELEGANS. Coral Drops. If stored place and planted in the garden in the spring it can be grown with periect ease; its umbels of bright coral-like flowers owen in succession during fully two months of the late summer. The flowers are of vermilion red, varionsly marked with white on the inner surface; bright purple anthers. Height, 1 to 2 feet
BLEEDING HEART. Dicentra or Dielytra: of spring-flowering plants, with elegant preen drooping racemes of hear1-shaped flowers. This is deemed one of the finest of all hardy garden plants, and is frequently forced for greenhouse or conservatory decoration. As it is perfectly hardy it only requires to be planted where it is to remain. If potted in November, left outside till it has formed new roots, and then brought into a gentle heat, it may be had in flower in the greenhouse in February and March. (Ready in November.) (See cut.)
Spectabilis. Magnificent racemes of pink and white flowers.
Cucullaria. Similar to the above, one of our most beautiful spring flowers; fern-like foliage and a profusion of white blossoms

BLOOD ROOT. Sanguinaria Canadensis Major. of our native American "Blood Root," a fine, hardy, spring blooming low-growing plant for shady beds; handsome leaves, large pure white flowers, height 6 inches. (See cut.).

NEW BEGONIA CRISTATA-TUBEROUS ROOTED.

BLEEDING HEART (DIELYTRA.)

bLOOD RONT, LARGE FLOWERING.

new yellow calla, "Elliottiana."

new calla, "fragrance."

bravoa, "MExican twinflower."

BRODIFA.
Showy, half-hardy California bulbs, with tubular flowers, borne in clusters, on stems 1 to blue or white They are easily forced and may be grown in the greenhouse or cold frame, or if planted out in spring in clumps or masses they flower very freely in June or July. (See cut.)
Californica. Each bulb bears usually several large umbels of broadly funnel-formed, large waxy pink flowers of thick texture and lasting longest of all Brodiæas.
Coccinea. (Floral Fire Cracker.) The tall stems bear large umbels of pendent flowers 2 inches long of rich glowing crimson tipped with light green-very novel and handsome.
Howelli Isaciniata. Throws up sturdy stems 2 feet high crowned with large fat umbels of flowers of a milk white color delicately blended with lilac blue. (See cut.).
Ixioides Splendens. 16-inch flower stalks, bearing clusters 8 inches across, containing from 40 to 50 large, tubular, light yellow flowers; most showy and handsome-forces well..
Stellaris. Forms a beautiful, compact, low plant, each bulb producing reveral many-flowered clusters of flowers-color, deep
Peduncularis. Pure white
often 20 ines. The coll inches across-a good grower
each of above 6 named Brodiæas, 1 bulb each, 40 c .; 3 each, \$1.00; 6 each, \(\$ 1.75\); 12 each, \(\$ 3.00\).
Mixed Brodiæas, čontaining many beautiful sorts
BULBOCODIUM. Vernum. Spring Colchicum ing early spring-blooming plant, in flower two weeks before the Crocus. Producing masses of rose purple flowers, very beautiful for edgings and patches here and there breaking up through the snow in juxtaposition with Snowdrops-it is a charming sight -clumps of them dug up and potted in the winter and placed in a sunny window will soon be a mass of bloom. (See cut.)
BRAVOA. Mexican Twinflower. Pretty little graceful in sheltered bulbous plants hardy south of tassington and they are positions north if protected. They flower in July; also beautiful when grown cool in pots for late winter blooming; the tuhular, brilliant, orange-scarlet twinflowers are borne gracefully on stems, sometimes 2 feet long.
Geminifiora. (See cut.)
CALLA. Ethiopica, or Eily of the Nile. This old quire any description. We offer dry roots, as they are superior for forcing and winter-flowering purposes; they come into bloom quickly and require less room, making less foliage.
Extra large dormant roots.
First size roots.
Little Gem Calla Lily. This little pigmy rarely exceeds 12 inches in height, and blooms most abundantly. The flowers are not more than half the size of the common variety, and therefore can be used with telling effect in bouquets. It is in every way superior as a house plant to the larger-growing variety. Dry bulbs. (See cut.)
New Calla, Fragrance. Most charming flowers, with a fragrance similar to violets, very early, aud continuous bloomers. The plants are of medium size, compact in growth, blooming profusely under any ordinary treatment. "Fragrance" is a seedling of Little Gem, but grows nearly twice its size in all its parts, making it about half way in size between Gem and the old Standard Calla (grows from 15 to 18 inches high). It is earlier by a week or two in starting to bloom than others. see cut.
Yellow Calla, Elliottiana. A grand acquisition-thetinest Yeliow Calla we have seen; large, rich, deep golden flowers, often 4 to 5 inches across at the mouth; habit of growth and foliage like the old favorite White Calla excepting the leaves of Elliottiana are spotted with white, rendering it an unusually showy pot plant.
Spotted Leaf Calla. (Richardia Alba Maculata.) This plant is always ornamental, even when not in flower, the dark green leaves being beautifully spotted with white, in other respects the plant is similar to the old favorite white Calla, excepting being of smaller habit. In addition to its usefulness as a pot plant it makes a fine thing for planting in the garden in the summer, belag very effective.

Calochortus Venustus mldorado. The most beautiful of all in balmon, blood red to claret in the difierent fowers, all marked in the centre of each petal with a showy peacock-like eye of brown and yellow, and all are beautifully dotted and lined and have deep red centres. Some of the flowers also have a large gold blotch at the top of each petal
Venustus Robusta. A splendid grower-flowers 2 to 3 inches across; of glistening white and deep purpleeyes,spots and markings Venustus Citrinus. A good grower; deep lemon yellow flowers, maroon eyes and brown centre; greatly admired.
Vesta. The Calochortus for general planting; hardy, vigorous growers in any soil, succeeding where others fail. The numerous flowers, 3 to 5 inches across, are borne on long stalks; petals, broadly fan-shaped; color, white, suffused blush to rose; centre beautifully marked, crimson, maroon and yellow; back of fiower purple
Clavatus. The largest flowered of all. Flowers like a broad bowl, sometimes 5 to 6 inches across, borne on a zigzag stem; color, brilliant orange; centre covered with stiff yellow hairs tipped with translucent knobs like tiny icicles.
Nitidus. Hardy, healthy and vigorous flower, large and showy; pale lilac with a large indigo bloteh in the centre of each petal, lined with long cobweby hairs.

PRICES
Doliv
Each.

12c.
"Fairy Bell" or "White Globe Tulip." (C. Albus.) Strong grower, 1 foot high, gracefully curving, branching stems with from 10 to 20 globular peudent flowers, 1 inch across, of exquisite pearly white
"Golden Bell." (C. Pplchellus.) Similar to the preceding; of a golden yellow, beautifinlly edged with stiff hairs.
"Parple Bell." (C. Purdyî.) Vigorous and strong, with large flowers completely filled with silky purple hairs, through which the white ground color of the flower is scen.
Mixed Calochortus. Contains many beautiful varieties.
CAMASSIA. Esculenta, "Indian Quamash"; perfectly shady situations. hardy, thriving in sheitered and partially , very handsome and valuable for flower borders, the stout flower stalks grow from 2 to 3 feet high and bear twenty or more large blue flowers, each two inches across; a large clump in bloom is very effective; the flowers are fine for cutting, lasting for a long time in water. (Seo cut.).
Cusickii. A grand, new species, destined to become a general favorite. The plant forms a rosette of broad, glossy, green leaves a foot long, from which rise spikes 2 to 3 feet high bearing hundreds of large, sky-blue flowers with yellow anthers; of sturdy growth, hardy in any climate
Leichtlinii. One of the finest, tall and showy with splendid purple flowers.
CHIONODOXA. Glory of the Snow. These are praised by all as one of the most exquisite spring-flowering plants, and should be grown in quantities under shrubs the effect is strikingly beautiful. They produce flower spikes bearing ten to fifteen lovely Scilla-like flowers. They are perfectly hardy, and may be planted as an edging to a bed, or in clumps or masses, where they are doubly welcome, flowering early in the season with the snowdrops, and lasting a long time in perfection. They will thrive well in any good garden soil, and are admirable for pot culture, for winter blooming in the house and for forcing for cut flowers. (See cut.)
Iuciliz. Charming bright blue with large clear white centre.......
Sardensis. Inteuse deep true blue; in masses its brilliant color catches the eye at a great distance
Gigantea. A great acquisition, difering from all others of this family by its unusually large flowers of lovely lilac blue, with conspicuous white centre. Is thoroughly hardy, and a perfect gem for spring decoration in masses in the garden, and when grown in pots for winter flowering it is beautifully effective.

cyClamen gigantedm.

EItANTBIS, OR WINTER ACÓNITE.
climber, with bright green glossy foliage and spikes of deliciously cinnamon-scented white flowers. It is perfectly hardy, the stem dying down in winter, but growing with great rapidity in the spring, so as to cover any trellisor arbor very early in the season. Large Select Roots (ready in November).

COOPRRIA. Drummondi. These make excellent pot plants for winter flowering and force well, or the bulbs can be kept dry and be planted out in the garden in the spring, where a clump of them planted close together will bloom successively irom May to September; the fowers are starshaped, pure white, flower half an inch across, with long tubes. expanding during the evening and emitting a delicious primroselike odor. (See cut.).

CRINUM. Kirkii. A handsome bulbous plant for either pot culture in the greenhouse or open ground planting in the summer months. This magmificent variety produces flowers of the greatest beauty. Usually two flower stalks of dark purplish color are sent up at the same time, each bearing a large umbel composed of a dozen or more enormous lily-like flowers of wondrous beauty and fragrance. The petals are broad and pure white, with a deep reddish purple stripe through the centre. Extra large bulbs. (Ready in Norember).

Well-known springblooming stately hardy border plants, with clusters of immense pendant bell-shaped flowers surmounted with a tuft of green leaves. They are very effective, and if left undisturbed for years they form gigantic and picturesque groups of gorgeous colors.

\section*{Aurora, Hed}

Crown upon Crown. Several whorls of flowers one above the other
Sulphurea. Sulphur yellow, slightly striped red
Golden Striped. (Folia Aurea Striata.) Rich green foliage striped with golden yellow ; the bright red flowers are ntrikingly effective against the beautiful, variegated foliage. This variety is of much value for pot culture...
Mixed Colors
CYCMAMEPMRIAN. These are among the most flowering bulbs for the window andinteresting winter and apring the flowers of striking beauty but the foliage is also highly ornamental, cousequently they are very decorative even when not in bloom. There are no plants better adapted for post culture, and few that produce such a profusion of bloom; the flowers range through many shades of pink, crimson, white, etc., some being beautifully spotted. Most of them are moreover delis:ately fragrant. (See cut.)
Persicum, mixed colors
Giant Persian Cyclamen. The flowers of this magnificent strain are of extraordinary size for a Cyclamen, and of great substance. The leaves are proportionately large and beautifully marked. Our bulbs are from the most famous Cyclamen grower in Europe and will produce flowers of rare merit. (See cut.)
Giganteum Roseum, rose color.

\section*{Album, white}

Eubrum, crimson
6 Mixed varieties
ERANTHIS. HYEMAIS. Winter Aconite. Early RAN INO in spring the golden blossoms of the Winter leaves and forming a striking contrat to the pure white Snowdrop, Spring Snowflake, and the lovely blue Scillas and Chionodoxa. The foliage remains long after the flowers, making the plant especially valuable in moist situations such as under trees, which the Winter Aconite enjovs, and where few other flowering plants will thrive, 3 to 8 inches high. (See cuit.).

EREMURUS. Majestic, tuberous rooted plants, natives of Turkestan and the are noble ornaments in a lare fower carden or on the lawn The individual flow ers-as large as a silver half-dollar-are closely arranged on stately spikes 6 to 10 feet high, forming a magnificent column of bloom during June and July. Eremuri thrive in almost any kind of soil, but prefer a moist, deep, rich sandy loam, with free run for their large, fleshy roots, which extend out several feet. Give them a sunny position, sheltered from gales; plant the tubers in the fall, while dormant, and set about 8 inches deep. Although they are considered hardy, it will be safer in Northern States to protect with 4 or 6 inches of leaves, strong manure or similar covering, to prevent the young growth, which starts very early, from being tipped from late freezes. We offer only strong, six-year-old floweringroots, as Eremuri seldom flower until that age. (See cut.) (Ready in November.)
E. Himalaicus. Snow-white flowers, with yellow anthers; height, 6 to 8 feet. Price, \(\$ 3.00\) each, buyer paying expressage
玉. Robustus. Peach pink flowers, very fragrant; height, 8 to 10 ft . Price, \(\$ 5.00\) each, buyer paying expressage

\section*{ERYTHRONIUM. Giant Dog's Tooth Violet.} the foliage is usually charmingly variegated, and a mass of 15 or 20 plants is a pretty sight even when not in flower, but when the graceful flowers are in bloom the effect is matchless. The plants luxuriate in rather moist, partially shady positions and do very nicely when grown in pots for winter blooming.
Grandiflorum. A very large flowering variety, bearing from 6 to 12 bright yellow flowers on stem 12 to 18 inches high
Giganteum. The most floriferous of the species, often bearing 12 to 16 flowers of straw color with centre of orange; leaves mottled dark brown.
Hendersonii. (New.) Large flowers of heliotrope or lilac color, with a purple centre surrounded by a narrow, yellow ring; one of the finest
Hartwegii. The easiest of all to grow. Light yellow flowers on separate stalks ; abundant bloomer; leaves mottled.
Johnsonii. A new rariety, and considered one of the handsomest. The plants are thrifty, freely producing flowers of a rich, dark rose with an orange-colored centre; leaves mottled dark brown and look as if varnished.
Revolutum Watsonii. Full crearny white flower, orange at centre; leaves mottled brown; one of the very best.
Mixed Californian Varieties.
FREESIA.
One of the most popular and charming bulbs we offer for pot culture, flowering in the winter and spring in the conservatory or window garden. 6 or 8 bulbs should be planted in a 4 -inch pot. They force readily and can be had in bloom by Christmas if desired, and by having a dozen or more pots started in the cold irame they can be brought in at intervals, thereby keeping up a continuous display of bloom through the winter; the flowers are produced 6 to 8 on stems about 9 inches high, and are particularly usefnl for cutting, remaining in good condition kept in water for two weeks.
Refracta Alba. The flowers are pure white with a yellow blotched throat and are exquisitely fragrant. (See cut.) Extra large bulbs.
\(\$ 10.00\) per 1,000 First size bulbs. \(\$ 7.00\) per 1,000
Ieichtlinii Major. (The new yellow Freesia.) This has charming, large primrose, yellow flowers marked with orange blotches, and very fragrant.
\(\$ 12.50\) per 1,000
FRITILLARIA. A singular group of dwari spring: ent bell-shaped flowers; they are invaluable for pot culture, and exceedingly pretty when grown in large clumps in the border in a dry situation.
Recurvata. The most beautiful Fritillaria in the world. Flowers brilliant orange scarlet; they are about 3 inches long and up to nine flowers are borne on each of the stems, the latter attaining a height of about 2 feet............................................Largest bulbs... Meleagris 工atifolius. (The improved broad-leaved, largeflowered Guinea Hen Flower.) Bell-shaped flowers of various colors, yellow, white, black, purple, striped aud splashed and checkered in the most curious way. Mixed varieties.
Aurea. A lovely new species, as rare as it is beautiful, bearing' large golden yellow bell-shaped towers, which are curiously checkered with black brown spots.

CILDIOLUS. Early Flowering Fardy. (ForAutumn ful Early-flowering Gladiolus are greatly prized on account of their blooming in June and July, if planted in the autumn in dry soil and protected with a covering of about six inches of straw. leaves or litter. If planted in cold frames they will flower as early as May, and this is perhaps, the better way in very cold localities. These Gladiolus are also invaluable for flowering in the greenhouse for wipter bloong. The flowers are smaller and more refined than those of the Gandarensis Gladiolus: the colors and markings are very handsome; the bulbs can he kept dormant until spring and then be planted in open ground if preferred. (Ready in November.) (See cut.)
Blushing Bride (Delicatissima). White with lovely pink and carmine flakes on the 16 mer petals
Rosy Gem. Delicate rosy pink; invaluable for cutting
The Bride (Colvilli Alba). Beautiful; purest white flowers, set closely on the stem most valuable for forcing for cut flowers. Alexis. Rosy cream, beautifully faked
Gen'l Scott. White tinged satiny rose, very fine
Prince of Orange. Dark orange pink, flaked white
Sarnian Gem. Salmon, with white and crimson flakes Chas. MacIntosh. Scarlet, with violet flakes
1 bulb each of above 8 named Gladjolus. \(70 \mathrm{c} . ; 3\) each, \(\$ 2.00\)
Mixed Early-flowering Fardy Gladiolus
GLOXINIAS. Most charming greenhouse plants, of dwarf across-are produced in greatest profusion, and are of the most exquisite and gorgeons colors; many of which are magnificently spotted, mottled and blended. Under the commonest culture they bloom continuously for months, and by starting at intervals, a succession of their splendid flowers may be had nearly the whole year round. (See cut.) (Ready in November.) Defiance. Glowing erimson scarlet, lustrous and rich.
Emperor Frederick. Bright rosy scarlet, bordered with a pure white band; strikingly beautiful
Tiger Spotted. Beautifully spotted and mottled
Kaiser Wilhelm. Velvety cerulean blue with deep white throat. Mont Blanc. Pure satiny white; exquisite..
1 bulb each of above 5 named Gloxiuias, \(65 c . ; 3\) each, \(\$ 1.75\)
Mixed Varieties
HELLEBORUS, Niger or Christmas Rose ing freely in almost any situation, flowering in great profusion in early spring, and if grown in the house, or in frames, will bloom from December all through the winter months. The flowers, two to three inches in dlameter, are of pure white. (See cut.) (Ready in November)..

IRIS. Rainbow Flower; Fleur de Iis. "The Orchid of the Flower Garden.' garden plauts, and for cut flowers they are invaluable. An almost continuous display of bloom can be kept up by planting the following varieties. Thosegrownin pots or frames for winter blooming will commence with Alata and Histrio, which will bloom in December and January, then follows Reticulata in February, then Bakeri, after which those in the open ground will commence with Bakeri and Pavonia in April
and May, followed by the Spanish in June, then the English, then Germanica, the Kæmpferis in July and August, and last, Alata in the fall.
English (Anglica). Large handsome flowers, with rich purple, blue and lilac colors predominatiag; grows 18 to 20 inches high. Perfectly hardy
Peacock (Pavonia). Pure white with a bright blue spot on each petal. Fine for pots or garden culture, 1 foot. (See cut.) ............
Reticulata. A lovely variety, color violet blue, lower petals of a darker shade with gold and white stripes, and veins spotted with black. Very sweet scented
Histrio. Charming new species-bright blue blotched yellow-and yearly
Florentina. Very beautiful pure white, slightly shaded with blue and with a yellow beard; deliciously violet scented.
Alata. (Scorpion Iris.) Grows about a foot high and its broad leaves much resemble those of the leek. The flowers are very large, measuring 4 to 6 inches across, a delicate lilac blue with showy blotches of brightest yellow spotted with a darker shade, the richest combination of colors imaginable. Its flowers are produced when our gardens are practically flowerless, commencing to bloom in October and producing a second crop of flowers in December if the weather be not too severe. It is admirably adapted for pot culture. (See cut.)
Susiana. (The Mourning Iris.) A remarkably handsome species with immense flowers, blush color, tinted with brown and covered with a network of dark lines; May-flowering; height, I foot.
Lorteti. One of the most beautiful. The flowers are very large and the coloring fine. A creamy white ground with crimson purple spots and veins, concentrated at the centre into a dark, crimson purple "signal." The standards are pure white with violet lines. Blooms in June. (See cut.)

Mikado. Rich crimson, with large veins of white, base of petals feathered yellow, small centre petals of lavender and plum.
Perfection. Clear pink veined and speckled with dark pink, reverse of petals red, centre yellow blotch, centre petals creamy, tipped red
Pride of Japan. Pure white, margined pink and veined white, lightly speckled with pink, yellow feather at base

\section*{LILY BULBS-Continued.}

Krameri. Distinct from all other Lilies; large flowers of a soft, beautiful rose color
Iancifolium or Speciosum. These varieties are perhaps the most popular Lilies grown, being easy of cultivation, and produce large fowers of delicate beauty on strong stems. Height from 2 to 4 feet; blooms in August. (See cut.) The varieties are
Iancifolium Album. White. Ist size bulbs.
Extra size bulbs
Iancifolium Roseum. White, shaded and spotted with rose. 1st size Extra size bulbs
Iancifolium Rubrum. White, shaded with deep rose and spotted red. Ist size bulbs.. Extra size bulbs
Lancifolium Melpomone. Rich blood-crimson, heavily spotted. Ist size. Extra size bulbs
Ieichtlinii. A beautiful Japanese species, of neat and elegant habit; the flowers are pure canary yellow, with crimson spots. A real acquisition; 3 to 5 feet: blooms in August
Iongiflorum. Well-known beautiful, snow-white, fragrant, hardy garden Lily; fowers trumpet-shaped, 6 to 8 inches long. This is also a splendid variety for forcing for winter flowers, and is also known as the "Easter or St. Joseph Lily." Height, \(11 / 2\) to 5 feet. In the open ground it blossoms in June and July.
First size bulbs, buyer paying transit, @ \(\$ 6.00\) per 100
Extra size bulbs,
(a) 10.00

Mammoth bulbs
(a) 15.00

Tongiforum Giganteum. A new large flowering variety-an improvement in every way; immense white trumpet-shaped fowers of great substance. Early flowering and of value for winter flowering. (See cut.).
Silver-leaved Longiflorum. Healthy green foliage broadly striped with silvery white on the margins, a very unique and beautiful plant; the flowers are trumpet-shaped, 6 to 8 inches long, fragrant, beautiful, snowwhite. This is a splendid variety for forcing for winter flowers.
Magnificum. A grand improvement over L. Humboldtii-grows 4 to 5 feet high, and often bears as many as 25 fiowers of clear orange, with maroon spots surrounded by red circles, giving a gorgeous effect. Foliage dark and glossy; a sure bloomer
Martagon. Purplish red, spotted with dark purple. Prolific bloomer. 2 to 3 feet high. Blooms in midsummer
Maritimum. A very distinct and beautiful new species, growing 2 to 3 feet in height; theflowers are horizontal and bell-shaped, of a beautiful bloodcrimson color, spotted maroon, on long wiry stalks
Pardalinum. Scarlet, shading to rich yellow, freely spotted with purple brown. 3 feet. July and August. (See cut.)
Paryii. One of the finest California lilies; long trumpet-shaped flowers of pure lemon yellow and fragrant; heigh t, 3 feet
Philadelphicum. Native variety; bright orange red, spotted with purple. Height, 1 to 3 feet. Midsummer.
Pomponicum Rubrum. (Scarlet Turban Lily.) This is very early-flowering, growing about 3 feet, bearing numbers of fiery-scarlet flowers. It grows freely
Speciosum. (See Lancifolium.)
Superbum. (Turk's Cap Lily.) One of our native species. When established in good rich soil it will produce upwards of 50 beautiful orange, tipped red, spotted flowers in a pyramidal cluster. 3 to 5 feet. Blooms in July.
Tenuifolium. A miniature Lily, having slender stems, 18 inches high, bearing 12 to 20 fiery-scarlet flowers. A gem for cutting, and easily grown in pots or in a warm dry border; early. (See cut.).
Tigrinum. (The Old Favorite Tiger Lily.) Large fowers, orange red, spotted with black; hardy, iree, and always does well.
Tigrinum Splendens. (Improved Tiger Lily.) The grandest of the Tigers, black polished stem, sometimes 6 feet high. Very large pyramids of flowers, orange red, spotted with black. 3 to 5 feet. Blooms in August.
Tigrinum Flora Plena. (Double Tiger Lily.) This is a plant of stately habit, growing from 4 to 6 feet high, bearing an immense number of double bright orange red flowers, spotted with black. Blooms in August.
Wallacei. Flower rich vermilion orange, spotted with raised maroon dots, autumn-flowering, thrifty grower. (See cut.)
Washingtonianum. A beautiful variety from Oregon, growing stiff and erect; flowers white, tinted with purple and lilac; 8 to 9 inches across when fully expanded, 3 to 5 feet high. Blooms in the summer.

HENDERSON'S CERISTMAS FORCING
lilly of the vabley

lachenalia.

LACHENALIAS. Beantifulearls spring fomering buios for conservatory and window garden decoration; the spotted foliage and spikes of brilliant flowers render them exceptionally striking. They are very easily grown, and can be had in bloom by Christmas if desired, or can be grown in cold frames if protected from frost. (See cut.)
2Telsoni. A new hybrid; without doubt the finest of the race, producing its large golden yellow flowers in long racemes with wonderful freedom, lasting in flower in acool house nearly two months. Of the easiest culture; treated same as Hyacinths.
Pendula. Very strong growing and handsome, fowers bright red tipped with green and yellow.
Rubida. Deep red freely spotted, one of the first in bloom. Very distinct and showy
LILY OF THE VALLEY. The tily of the Val most useful and greatly admired plants grown; the modest bell-shaped flowers of purest white are highly prized for cutting purposes, and for flowering in pots in the winter they are exceedingly well adapted and will last several weeks in beauty. By taking them in at intervals a succession of fowers may be kept up all winter. They are also forced in immense quantities by florists, but they are the most charming when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy, (Readj for delivery in November.)
Iarge-flowering German Single Crowns. Three years old, for forcing, pot culture, or open ground planting
( \(\$ 13.00\) per 1,000 , buyer paying transit.)
Fenderson's Extra "Christmas Forcing" Single Crowns. The finest grade of Crowns in the wolld for early winter flowering, they will bear twelve to sixteen large bells on strong stalks, with foliage, even when forced for extra early; the pips average large, plump and regular, with extra long roots. (See cut.).. ( \(\$ 18.00\) per 1,000 , buyer paying transit.)
Fortin's Giant. This is the largest variety yet produced; it is only adapted for open ground planting and may not show much superiority the first spring after planting, but by the second season, when it gets well established, it produces wonderfully luxuriant foliage and immense spikes crowded with purest white bells twice the size of any other sort. In every way it is superior....
Iarge Clumps of Iily of the Valley, for open ground planting.
LYCORIS. Japanese Haxdy Amarylis. These bulbthe Amaryllis ous plants are of great beauty; they belong to in the greenhouse or window garden. Coming from colder climates than the tropical Amaryllis, they thrive under cooler treatment. They make splendid garden plants, and this is the popular way of growing them in Japan and China. Grown outside they flower toward autumn. They have proved to he hardy grown in a warm, sheltered sunny border, protected with a frame or mulching during the winter. (See cut.)
Squamigera. A verystrong-growing and large-flowering variety, and perhaps the hardiest of the lot; it is frequently grown by the Chinese as a cemetery plant. The flower spikes are stout and solid, from 2 to 3 feet high, bearing umbels of from 5 to 7 large lily-like flowers about 4 inches in length, nearly twice the size of the other varieties. The color is a soft rosy pink, delicately tinged with silvery gray.
Aurea. Produces flower stems about 18 inches high, surmounted with from 12 to 18 deep yellow lily-like blossoms..
Japonica or Radiata. Flowerstems aboutafootlong with clusters offrom 8 to 12 fiery red lily-like flowers about twoinches across; colors very brilliant, and in the sunlight glisten as if spriakled with gold dust; the wavy, recurved petals and long red stamens give a graceful effect to the flower. Perhaps no bulbs bloom with more certainty and swiftness after potting; for autumn and winter flowering they are extremely beautiful
Sanguinea bears a cluster of large crocus-like flowers on 12-inch stems. Color, bright scarlet.

MILLA. Eiflora. Mexican Star Flower. A beautiful or bed of them is always in flower after the middle of summer and very attractive. Flowers star-shaped, 11/2 inches across, clear waxy white. of great substance, enlivened by a frost-like sparkle; the fragrance is delightiul. Place a stalk in water and the flowers will all open; we have seen 11 stalks shoot up successively from one bulb. The bulbs flower profusely and with great certainty. Height, 12 to 18 inches....
MONTBRETIAS. Most popular summer-blooming mulched to protect in cold sections in lein undisturbed and riant, bushy clumps, bearing long spikes of star-like flowers an inch or more across, which continue to bloom for months, making a magnificent display.
Crocosmiæflora. Large red flowers with yellow throat ............... Imperialis. A new and grand acquisition, Howers twice the size of the older varieties, often measuring three inches across, borne on from July to September, an exceedingly showy and satisfactory garden bulb
N \(\mathbb{E}\) GELIA. Mixed Varieties. Greenhouse plants of months. The leaves are 6 give them a rich, velvet-like appearance. They have erect racemes of large showy flowers.
NERINE, Guernsey Lilies. These beautiful Lilies are Amar probably the most popular and useriul of the解 andifness after potting; for autumn and winter fowering they are extremely beautiful, throwing up stems from 18 to 24 inches, surmounted with lily-like flowers about two inches across; colors very brilliant, and in the sunlight glisten as if sprinkled with gold dust. (See cut.)
Sarniensis. (Guernsey Lily.) Rich salmon red
Fothergilli Major. This is one of the most beautiful bulbous plants for the conservatory or window garden. It is a vigorous grower, flowering with great certainty and producing clusters of large wavy petaled lily-like flowers of the most glittering vermilion scarlet. It blooms at various seasons. It requires potting but seldom and should be left to grow, blossom and increase for several years, as well-established plants when in flower are simply magnificent. We know of no plant that will give more continued delight than this. (See cut.)
ORNITHOGALUM. Arabicum. Star of Bethlethrowing up a tall spike bearing numprous large, milk-white star-shaped flowers, with a black centre, and having a distinct aromatic perfume. They are decidedly pretty and interesting when grown in the garden-but are more largely grown for greenhouse and window decoration, being of the easiest culture. Largely forced by florists now for cut flowers. (See cut.)..
OXALIS. Charming little half-trailing or bushy plants, parbaskets; the foliage alone is very attractive, and when in flower they are exceedingly pretty.
Arborea alba, a white-flowering, trailing variety, for baskets....
Arborea rosea, a rose-colored sort, for hanging baskets
Bermuda,"Buttercup'" Oxalis. An unrivaled winter-flowering pot plant, of the easiest culture. It is such a strong, luxuriant grower that one bulb will be sufficient for a 6 or 8 inch pot, and the great profusion of bloom produced in uninterrupted abundance for weeks is astonishing and delightful. The flowers are of the purest bright buttercup yellow
Boweii, vivid rosy crimson, large flower.
Iutea, splendid large canary yellow
Tutea, fl. p1., very double bright yellow.
Rosea, rose. (See cut.)
Alba, white.
Deppei (Speciosa), rosy purple, splendid for garden edginge.
Versicolor, crimson and white.
Mixed Oxalis

SCILLA-AMENA OR SIBIRICA.

SCHITOSTLS. Coccinea. (Crimson Flagor Kafit bulbous plant; the leares are neat and are rosy scarlet, borue on tall spikes; the bulbs are usually planted outin spring, and in the autumn the plants are lifted, potted and brought into theconservatory, where it will bloom for months; splendid for cut flowers.
SCHILAS, Amcna or Sibirica Pracox. Among our rof most beautiful hardy spring bulbs, producing in now has imsses of exquisite rich blue flowers almost before the carpet the ground; and if grown with Snowdrops and Crocuses for contrast, the effect is maguificent. Grown in pots they may be had in bloom from Christmas until April.
Bifolia. Most beautiful bright blue flowers borne on short spikes; these should be extensively planted; they are also fine forforcing..
Peruviana or Clusii. (Peruvian Hyacinth.) Very beautiful; blooming rather late in the spring, bearinglarge pyramidal spikes of rich blue flowers, which remain in bloom along time; beautiful objects when grown in pots. Not hardy...........................10c. each.
Campanulata (Wood Hyacinth.) Flowers borne on tall spikes, one to two feet high. Each flower measures nearly one inch across and droops gracefully, periectly hardy, also fine for pots.
Campanulata, Blue..
Campanulata, White
SNDNDDPD In the early spring months there is the snowy graceful blossoms of the Snowdrop. Effects of surpassing beauty may be arranged with Snowdrops in the centre, edged with bright blue Scilla Sibirica, or Chionodoxa Luciliæ, or by intermingling them. When practicable such plantings of the Snowdrop should be permanent. The Snowdrop and the Crocus when planted in alternate circles are very effective and follow each other in bloom so closely that no gap is left in the succession. Used as a permanent edging and in masses on the edges of lawns, nestling in the grass, they are charming. (See cut.)
Single Snowdrops.
4c. each. Llwes' Giant Snowdrop One of the finest of the genus, at least three times the size of the ordinary siogle Snowdrop, flowers slightly marked with green spots; very fine for cutting and slightly sweet-scented
King of Snowdrops. (Galanthas Cassaba-Robusta.) A new introduction and one of the best in the gemus. The foliage is large, the growth robust and taller than others. The flowers are immense for a Snowdrop, having sepals over an inch long and rather broad, pure white, with intense dark green inner divisions; the flower stems are thick and upright, and fine for cutting; the bulbs are large. (See cut.)......................................................... each.
SPARAXIS Exceedingly large and beautiful, blooms about two inches across, of the most teling combinations and of the brightest shades of color, certain to please even the most fastidious; they are tigered, blotched, spotted, streaked and flushed in the most diverse and pleasing manoer. They are not hardy but do exceptionally well when grown in the conservatory or house in pots or in cold frames. (See cut.)
Angelique. White with yellow eye
Bliderdijk. Rose, spotted dark red.
Crandifora. Crimson with yellow centre
Minerva. White and dark rose
Queen Victoria. Blue, white and purple.
Tricolor. Orange, spotted red and white.
Mixed Colors.
SPRING SNOWFLAKE. Lencojum Vernum, monster snowdrops; very graceful in growth, having the delicats fragrance of the Violet. It is one of our earliest spring flowers with white blossoms distinctly tipped green, handsome in outline nnd prized for bouquets. They should be grown in quantities in the borders or in spots on the edges of shrubbery, where they are beautifully effective, and when established produceenormous quan tities of flowers. They can also be slowly forced in pots for winter bloom. (See cut.)

SPRING SNOWFLAKE (LEUCOJUM).

spirea, or astilbe.

TRILLIUM.

SPIRAEA, or ASTILBE. In garden culture these summer, and are perfectly hardy, but their great value is when grown in pots for window and greenhouse decoration, in winter and spring, and for forcing for cutting. The flowers are borne in large, feathery panicles of white, and last a long time in bloom. (Ready for shipment in November.) (See cut.)
Japonica. The old favorite
Prices if buver pays transit, 12 c . each. \(\$ 1.25\) doz., \(\$ 6.00\) per 100. Astilboides Floribunda. A great improvement. The flowers are borne in large, feathery panicles of purest white, and last a long time in bloom. It is dwarfer in habit, earlier and more profuse in bloom than Spirxa Japonica. Undoubtedly one of the most beautiful and graceful subjects grown for winter and spriag decoration in the house and conservatory, while for grace and elegance as a cut flower it is unequaled.
Prices if buyer pays transit, 15 c . each, \(\$ 1.50\) doz., \(\$ 9.00\) per 100 .
Nana Compacta Multiflora. Its merits consist in compact growth, ample foliage of brilliant green, and its wonderfully free production of feathery white flowers, borne in plume-like panicles of magnificeat proportions.
Prices if buyer pay's transit, 15 c , each, \(\$ 1.50\) doz. \$9.00 per 100 . Aurea Reticulata. Flowers pure white in large clusters, foliage beautiful green elegantly veined with yellow, very handsome Prices if buyer pays transit, 15c. each, \$1.50 doz.
 and useful of autumal-flowering bulbs produced from September to November, are much like a Crocus, but larger, and the petals more fleshy and of such firm texture that they withstand any amount of bad weather, brightening up our gardens long after other flowers are gone. They are not only very hardy but increase rapidly
S. Intea. Large, pure yellow, Crocus-like flowers, which are producゃd with the leaves during late autumn. (See cut.)
S. Macrantha. A new and valuable addition to our small list of hardy antumn-flowering bulbs; the flowers are nearly six inches across when wide open under the influence of the bright sunlight, and of a bright golden yellow, slightly flaked with emerald when they first open. The leaves are produced after the flowers.
TIGDIDIA\&. Peacock, or Shell Flower. Extremely handsome summer-flowering garden bulbs for spring planting, growing about two feet high, producing large, gorgeous flowers, exquisitely spotted. (See cut.) (Ready in .vor.) Grandiflora Conchiflora. Dark yellow, large red spots.

Pavonia. Bright crimson, centre mottled yellow. Alba. White, with yellow cup spotted crimson Iilacea. Iilac, with purpleand whitespots in centre Rosea. Bright rose-pink
Aurea. Pure, deep, golden vellow.
Immaculata. Pure spotless white
TRILLIUTI. (Graat American Wood LLif:) Most bentitul American plants, perfectly hardy, growing and flowering profusely in partially shady nonks about the lawn, under trees, etc. If grown several in a pot it makes one of the best winter flowers.
Grandiflorum Album. The flowers are large, of the finest white changing in a few davs to soft rose
Sessile Californicum. A beautiful variety with mottled foliage Flowers pure white
Grandiflorum Roseum. A new pink variety. This is one of the largest and most beautiful of the American Toonl Lilies. The flowers are large, often five inches across, of a bright rosy pink, changing as they age to deep wine red.
TRITELEIA, Uniilora. (Spring Star Flower) a per very early spring months; the gem for pot culture. It flowers it be grown in a months, the bulbs aresmall and severat should bulb prod a pot; it grows about six to eight inches high, each milky whitesuffused with blue, andemits the perfume of primroses they are perfectly hardy and grown in quantities in a sunny border or for edgings they are very effective. (see cut.).

PALMS.We call particular attention to our list of Palms (see page 51), and venture to say that for the money expended there is nothing we offer which will give more satisfaction to our customers. They are especially grown for window and room culture, and with ordinary care can be kept in perfect condition for years. Our stock of Carnations, Primroses, Azaleas, Violets and other winter-blooming plants is exceptionally fine, and contains only such varieties as are specially adapted for this purpose. In this connection we would say that the variety of plants which will thrive and bloom during the winter months is comparatively limited, and the lack of success which occasionally discourages amateurs is due more frequently to a poor selection of varieties than to mistakes in culture. With this point in view, we have carefully selected only such sorts as are adapted for this purpose, so that the most inexperienced amateur is perfectly safe in ordering from this catalogue, from the fact that it contains only such plants as are highly ornamental, either in flower or foliage, during the fall, winter and early spring months. We also offer a range of sizes in nearly everything, thus enabling customers to secure a large plant for immediate effect, or a small one at a low price, if desired.

\section*{About Forwarding Plants.}

\footnotetext{
Unless otherwise ordered we send all plants by express (buyer to pay charges). Hardy shrubs and vines and hardy roses may be sent safely by freight, but unless the shipment is a large one express is cheaper, quicker and safer. Small lots of Geraniums, Fuchsias, Young Palms, Begonias, Ferns, Violets, Heliotropes and Primulas may be sent free by mail, if desired. WE GUARANTEE the safe arrival of all plants sent by express. Should anything be injured in transit, send us a list of what has been damaged, so that we can replace them. If.in good condition, when received, our responsibility ceases, and if from inattention or other causes they fail and complaint is then made, we cannot replace them. Plants sent other than by express are eptirely at the risk of the purchaser.

Under the new ruling of the leading express companies, ADVOCATED AND SECURED BY US, plants packed in closed boxes or baskets will now be carried packed in closed boxes or baskets will now be carried dise rates.
}

\section*{Collections of Plants for House Culture.}

Many amateurs are often at a loss what plants to select from the great variety offered in a catalogue, and to aid such we offer the following collections. In these collections we send our best plants and finest varieties, and purchasers secure them at less than regular rates, but in every instance the selection must be left to us. These collections embrace all the leading plants suitable for winter-flowering or decorating, all of which may be grown in a light window or sitting-room, such as Begonias, Carnations, Chrysanthemums, Fuchsias, Geraniums, Heliotropes, Palms, Primulas, Roses, Violets, etc., etc.
Collection No. 1. 12 plants for ..... \(\$ 2.25\)
Collection No. 2. 25 plants for. ..... 4.00
Collection No. 3. 50 plants for. ..... 7.00
Collection No. 4. 100 plants for. ..... 12.00

\section*{GHINESE AZALEAS. Reath nomumer}

No plant has increased in popularity during recent years with such nmazing rapidity as the Chinese Azalea. A few years ago the annual importation would hardly ex eed twenty-five thousand, to-day it probably reaches two hundred and fifty thousand. At Easter they are seen in every church and in the windows of our finest residences throughout the country.

\section*{DOUBLE-FLOWERED AZALEAS.}
A. Borsig. A pure white, fine flower and form.

Apollo. Large semi-double flower; blood-red.
Bernard Andrea Alba. Very fine double white.
Concorde d'Orange. A grand double red.
Dame Matson. Clear white, red markings.
Deutsche Perle. Pure white; fine for forcing. Docteur de Moor. Intense rose and violet. Empereur de Bresil. Double pink, edged white. Illustration. Pink, marked white; a very pretty sort. Imperatrice des Indes. Rose, edged white.
Mme. Camille. White, striped and stained red.
Mme. Van der Cruyssen. Bright rose. (See cut.)
Niobe. Fine double white of extra substance.
Raphael. Pure white, double flower of fine form; late.
Simon Madner. Large flower; intense rose.
Vervaeniana. A beautiful rose, deeplyedged with white and spotted slightly with rosy red on the lower part of the upper petals.

\section*{SINGLE-FLOWERED AZALEAS.}

Apollon. Large, single white, sparingly lined red.
Eugene Mazel. Salmon rose, upper lobes violet. Mme. de Grevy. Flesh color, spotted crimson. Queen of Whites. Very fine, pure white.
Roi d'Hollande. Blood-red, spotted black. Sigismond Rucker. Lilac rose, striped white. Versicolor. Pure white, heavily striped deep red. Fine plants, 14 to 16 inches across, \(\$ 1.50\) each, \(\$ 15.00\) per doz.; 12 to 14 inches, \(\$ 1.00\) each. \(\$ 9.00\) per doz. ; 10 to 12 inches, 60 c . each, \(\$ 6.00\) per doz. (Ready in October.)

Acalypha Sanderi, the "Comet Plant."
(The illustration shows a plant two feet high.)
. THE

\section*{"Comet Plant"}

\section*{(Acalypha Sanderii.)}

For all purposes of ornament and decoration, this large crimson-scarletflowered Acalypha amply fulfils every requirement. For the plant houses, conservatories or rooms-and under all and every condition where a startling and beautiful effect is needednothing can equal it. Its easy culture, freedom of growth and perpetual flowering characters are indispensable recommendations. From January to December it can be had in blossom, and with quite ordinary attention.

It can be grown on single stems, as bushes, as standards, or trained to almost any shape.

For table decoration and for cutting, each long, brilliant, scarlet-crimson inflorescence will prove indispensable; their highly ornamental effect cannot be overestimated. (See cut.)

Price, first size plants, in bloom, \(\$ 1.00\) each, \(\$ 9.00\) per doz ; second size plants, in bloom, 60c. each, \(\$ 6.00\) per doz.; third size, young plants from 3-inch pots, to bloom shortly, 30c. each, \(\$ 3.00\) per doz.

\section*{For WINTER BLOOMING.}

Aramazindy. Snow white, lightly pen ciled scarlet.
Emily Pierson. Deep red, fine large flowers.
G. H. Crane. Brilliant scarlet.

Gold Nugget. Clear yellow, very fine.
Earrison's White. (Puritan.) Pure white, large Howers borne on long stems.
Lizzie McGowan. One of the best white varieties.
Meteor. Beautiful crimson maroon.
Mrs. Jas. Dean. Beautiful light pink.
Scarlet Wave. Deep brilliant red.
Victor. Deep salmon pink. A "sport" from Daybreak and considered superior to it.
Wm. Scott. Flowers large and non-bursting, of a deep pink, stems long and of good strength. (See cut.)
Price, plants from open ground, not potted, 20c. each, \(\$ 2.00\) per doz., \(\$ 12.00\) per 100 ; strong plants established in 5 and 6 inch pots (ready Oct. 1st) for winter blooming, 40 c . each, \(\$ 4.00\) per doz., \(\$ 25.00\) per 100 .
CAMELLIA JAPONIGA. The collection embraces
 YPERUS ALTERNIFOLIUS. This is the popular
ordinary house plant, suceeeding nider either culture. Prive, fine plants, 200. each, 52.00 per doz.

fSPIDISTRA LURIDA VARIEGATA. A beautiful plant, with large, variegated with clear, eream. colored stripes. An elegant window or conservatory plant of the easiest culture, \(\$ 1.00\) each. Plain green, 50 c . each.

A most valuable addition to our list of winterblooming plants. Most people are familiar with \(\xrightarrow{\text { (6) the old form of Browallia, and would searcely recopiize. this grand new }}\) varietty of the same family. The fowers are

\title{
It is most useful, either as an aquarium plant or as an
} lance-shaped leaves, finely

PARAGUS SPRENG indigo blue, fully 2 inches across, and cover

\section*{LARGE FLOWERING.}

HENRYII. A pure white, large-flowering variety, of fine form, and recognized as by far the finest

SPECLAL NOTLCE. On account of the brittleness of the bark on Clematis it cracks very easily, and many people believe the plant to be permanently injured when such is not the case. We issue this notice on account of the numerous letters we get on the subject. We wish to say, also, that we examine all plants carefully before shipping, to see that they are in good condition, and if they die after being planted, as must sometimes happen, we do not agree to replace them. of the single white sorts. It is a much stonger grower than most of the other varieties, and is entirely hardy. Excellent for cemeteries or wherever a hardy climber is desired. (See cut below.) Large strong plants, 60c. each, \(\$ 6.00\) per doz.
Duchess of Edinburgh. This variety is perfectly double, like a rosette. It is sweetly fragrant, and equally hardy and vigorous with the others. Price, 1st size, large plants, 60c. each, \(\$ 6.00\) per doz.

SMALL FLOWERING

\section*{OLEMATIS.}

Paniculata. One of the most beautiful of our hardy fallblooming vines The flowers are pure white, very fragrant, borne in large clusters fairly covering the plant, so that it is a mass of fleecy white; the fragrance is delicious. (See cut.)
Coccinea. Bright vermilion scarlet; flowers cone-shaped. Crispa. Flowers bell-shaped purplish blue, very fragrant. Price for the above, 20c. each, set of 3 for 50 c .

\section*{OLEMATTIS JACKMANII.}

The best-known and most valued variety of this popular family. A most perfect mass of bloom when in full flower. Color, dark, rich, royal purple. The above engraving gives a good idea of this superb Clematis. (See cut.) 1st size, 60c. each, \(\$ 6.00\) per doz.

\section*{場GHRYSANTHEMUMS..."}

SPECIAL NOTICE.-Want of space in this catalogue will not permit us to list our full collection of Chrysanthemums. We have in stock, however, all the varieties offered in our spring catalogue of "Everything For the Garden," and can supply them at the prices quoted therein-plants from 2 -inch pots.
If the selection is left to us, we can furnish a grand assortment at \(\$ 1.00\) per doz., \(\$ 6.00\) per 100 .

\section*{LARGE FLOWERING}
(ASSORTED).
Jackmanii Superba. Deep violet purple. A grand variety.
Ramona. Lavender, very large.
Alexandra. Violet, light centre.
Countess of Lovelace. Bright bluish lilac, double flowers.
Lanuginosa Candida. Pure white.
Miss Bateman. Silvery white, dark anthers. An attractive sort.
Gipsy Queen. Rich velvety purple.
Price, large two-year-old plants, 60c. each, \(\$ 6.00\) per doz.

\section*{HARDY HERBHGEOUS PLANTS}

A good assortment of our selection for fall planting. Price, 20c. each, \(\$ 2.00\) per doz. Set of 24 separate kinds for \(\$ 3.50\).

\section*{HOUSE FERNS.}

Our collection contains the choicest, including the "Maiden hair" and best basket and vase sorts. They are of the easiest culture, and nothing beautifies \& home more than Ferns. Price, 1st size, 25c. each, \(\$ 2.50\) per doz. ; 2d size, 15 c , each, \(\$ 1.50\) per doz.
Globe Fern. (Davallia Bullata.) We offer this prepared in globe shape ready for hanging up. Price, \(\$ 1.00\) each.
Moss Fern. (Selaginella Emiliana.) Very graceful and pretty, and useful for jardinières or single specimens in small Japanese pots. Price, 1st size, 25c., \$2.25 per doz. ; \(2 d\) size, 15 c ., \(\$ 1.50\) per doz.

\section*{DOUBLE GERANIUMS.}

\section*{Gloire de France. Salmon and white.} Profusion. Rich glowing salmon. (See cut below.)
Duc de Mortemort. Deep rose.
Silver Queen, Pure white.
Double Gen. Grant. Bright red.
Le Cid. Dark crimson.
Price, 10c. each, \(\$ 1.00\) per doz. ; set of 6 for 50 c.

\section*{SINGLE GERANIUMS.}

I'Aube. White. Very free flowering.
Single Gen. Grant. Brilliant scarlet.
Salmon Queen. Salmon pink, a very attractire sort.
Mme. Bruant. (Aureole.) Bright solferino, centre white, veined with carmine lake.
Columbia. (Aureole.) Light dazzling scarlet, centre white, veined scarlet.
Freedom. (Aureole.) Dazzling rosy scarlet, centre white, veined scarlet.

Price, 10c. each; set of 6 for 50c.

\section*{HELIOTROPES.}

Indispensable for bouquets and vases of flowers.

\section*{"BOSTON" FERN. \\ Nephrolepis Bostoniensis.}

One of the most useful and ornamental of the " Sword Ferns." It is now grown by the thousand for the market in all the large cities, and is steadily increasing in popularity. In well-grown specimens the fronds attain a length of 6 or 7 feet, like plumes arching over in every direction, in a most graceful manner. This beautiful Fern is excellent for outside planting in shady borders. It is a very fine plant for hanging pots or baskets on the piazza in summer and conservatory or window in winter. (See cut.)

Price, plants from 7 and 8 inch pots, \(\$ 1.50\) each ; 6Inch pots, \(\$ 1.00\) each ; 5 -inch pots, 60 c . each, \(\$ 6.00\) per doz. ; 4-inch pots, 35 c. each, \(\$ 4.00\) per doz. ; 3-inch pots, 20 c . each, \(\$ 2.00\) per doz.

\section*{Compact Sword Fern. Nephrolenis Gordata}

A fitting companion for the above; dwarfer and more erect in growth, a much darker shade of green, and very gracefully arched. For decoration in front of taller plants it is admirable. As a house plant it is very desirable.

Price, large specimens in pans, \(\$ 2.00\) each; 1st slze plants, \(\$ 1.00\) each, \(\$ 9.00\) per doz.; \(2 d\) size, 60 c. each, \(\$ 6.00\) per doz. ; 3d size, 30c. each, \(\$ 3.00\) per doz.

\section*{Gupled Sword Fern. \\ Nephrolepis Davallioides Furcans.}

Entirely distinct from the two described above. The fronds are long and broad, a glossy dark green, beautifully crested at the tops into curling masses of rich green, feathery foliage, the weight of which bends the fronds down so as to conceal the pot, allowing a full view of the centre of the plant.
First size plants, \(\$ 1.50\) each; 2d size, \(\$ 1.00\) each, \(\$ 9.00\) per doz. ; 3d size, 60c. each, \(\$ 6.00\) per doz.

Their rich tints of lavender, blue and purple, and exquisite vanilla perfume, are familiar to all. 10c. each, \(\$ 1.00\) per doz.

\section*{"PANSY" GERANIUMS.}

The Bride. Large flowers, upper petals bright carmine, feathered white, lower ones white, suffused blush.
Bridesmaid. Upper petals maroon, lower onesclear white; this variety is shown in cut below. An exceedingly pretty variety.
Bridegroom. Lavender pink, darker on upper petals, with dark blotches. Price, 20c. each. The "Wedding Set" of 3 for 50 c .

\section*{(All]}

\section*{LATANIA BOREONHCA (Fan Palm)。}

This fine Palm is too well known to need any extended description. Price, 3 -in. pots, 25 c . each, \(\$ 2.25\) per doz. ; 4 -in. pots, 50 c . each, \(\$ 4.50\) per doz.; 5 -in. pots, 75 c . each, \(\$ 7.50\) per doz. ; large plants from 7 and 8 in . pots, \(\$ 2.00\) and \(\$ 3.00\) each.

\section*{KENTEAS RELMOREANA AND FOSTERIANA.}

The Kentias are among the best of the Palm species for general cultivation. (See cut.) Price, strong plants, 8 -in. pots, \(\$ 4.00\) each; from 7 -in. pots, \(\$ 3.00\) each ; from 6-in. pots, \(\$ 2.00\) each; from 5 -in. pots, \(\$ 1.50\) each, \(\$ 15.00\) per doz. ; from 4 -in. pots, 75 c . each, \(\$ 7.50\) per doz. ; from 3 -in. pots, 35 c . each, \(\$ 3.50\) per doz.

COCOS WEDDEHLIANA.
This beautiful Palm is unquestionably the most elegant and graceful in cultivation. The finely cut leaves are recurved with exquisite grace. Price, 2 feet high, \(\$ 1.50\) each; 18 to 20 ins. high, \(\$ 1.00\) each; small plants, 25 c . each, \(\$ 2.25\) per doz.

\section*{ARAUCARIA EXCELSA. \\ (Norfolk Island Pine.)}

\section*{ARECA LUTESCENS.}

This majestic Palm is withont a peer for strength and elegance combined. Price, fine bushy plants, 18 to 20 ins. high, \(\$ 1.00\) each, \(\$ 9.00\) per doz. ; 20 to 24 ins., \(\$ 1.50\) each, \(\$ 15.00\) per doz.; 28 to 30 ins., \(\$ 2.00\) each, \(\$ 20.00\) per doz. ; 36 to 40 ins., \(\$ 3.00\) each.

\section*{RRUBEEREPLANTS.}

We have a splendid stock of this useful and ornamental plant, which will flourish under the mostadverse conditions. Price, 12 to 15 ins. high, 50 c . each, \(\$ 6.00\) per doz.; 15 to 18 ins., 75c. each, \(\$ 7.50\) per doz. ; 24 to 30 ins., \(\$ 1.25\) each. Plants five feet high, \(\$ 3.00\) each. Tree Rubbers, with several branches, \(\$ 2.00\) each.

\section*{DRACAENA FRAGRANS.}

Deep green, broad, gracefully drooping leaves, Price, plants from 4 -in. pots, 60 c . each, \(\$ 6.00\) per doz.

\section*{DRACAENA TERMINALIS.}

Bronze red, variegated crimson and pink. 40 c . each, \(\$ 4.00\) per doz.

\section*{DIEACAENA LKNIENII,}

One of the finest of the species. Broad, strong leaves, gracefully recurved, heavily banded with creamy white and yellow on deep green ground. 4 -in. pots, \(\$ 1.00\) each.

\section*{DRACRENA SANDERIANA.}

A very pretty, variegated variety, marked green and white. Excellent for centres of jardinieres. Price, 50c. each.

\section*{PANDANUS VEITCHII.}

This is a grand decorative plant, creamy white variegation. Fine plants from 9 -in. pots, \(\$ 3.00\) each; 8 -in. pots, \(\$ 2.50\) each; 7 -in. pots, \(\$ 2.00\) each; 6 -in. pots, \(\$ 1.50\) each; 5 -in. pots, \(\$ 1.25\) each ; 4 -in. pots, \(\$ 1.00\) each.

\section*{THE "WINDOW" COLLEC'TION OF PALMS.}

THESE we offer at a very low price for the collection so as to induce our customers to procure them, believing that there is nothing we offer which will give greater satisfaction for the money invested. These young Palms are easily grown into large specimens-one year's growth increasing their value four fold at least. Sent free by mail, if desired, but we advise that they be sent by express (buyer to pay charges), as in that case we will leave all the soil on the roots, an undoubted advantage. See varieties below.
1 Latania Borbonica, 1 Kentia, 1 Cocos Weddelliana, 1 Seaforthia, 1 Phoenix Rupicola, 1 Areca Lutescens, 1 Phoenix Reclinata, and 1 Pandanus Utilis. THE EIGHT PLANTS FOR ONLY ONE DOLLAR.

Note.-Pamphlet of instructions on the care of Palms in dwelling houses will be sent free to customers upon application.

\section*{OUR NEW}

\section*{(Plants on their own roots.)}

This grand Rose was shown on a colored plate in our spring catalogue. It was awarded the gold medal by the Massachusetts Horticultural Society, the only Rose to obtain that honor. It is the finest dark red hardy garden Rose yet produced. A pure red in its deepest tone, shading to deep crimson red and velvety maroon red in the depths of the petals. It fairly glows in its rich warmth of covering and has a rich velvety finish, containing the darkest color combined with pure color of which nature is capable.
Price : Strong plants from 5 -inch pots, 50 e. each, \(\$ 4.50\) per doz. These plants are two years old, grown on their own roots, and should produce a nice crop of flowers next year if planted this fall.

Plants from open ground, ready October 20 th, 30 c. each, \(\$ 3.00\) per doz.

NEW ROSE *

\section*{Mrs. Robert Garrett.}

\section*{(Plants on their own roots.)}

A variety of American origin, therefore it is a certainty that it will prove to be adapted to our climate.

It is difficult to describe this Rose; much of the coloring is due to its form and its semi-transparency, and is generated as it were in the Rose itself. Speaking broadly, the general color effect is a glowing shell-like pink.

Price: 1st size, strong 2 -year-old plants, 50 c . each, \(\$ 4.50\) per doz. ; 2 d size, 30 c. each, \(\$ 3.00\) per doz. ; 3d size, 15 c . each, \(\$ 1.50\) per doz.

Plants ready now.

gold medal rose, "jubilee."

\section*{Assorted HARDY ROSES for Outdoors or Pot Culture.}

Alfred Colomb. Carmine crimson. Anna de Diesbach. Rich carmine. Ball of Snow (Boule de Neige).

A grand Rose.
Large, pure white, globular flowers, very fragrant.
Baron de Bonstetten. Blackish crimson, with vivid red shadings. A very handsome and rich variety.
Baroness Rothschild. An exquisite shade of satiny pink. Large cupped flowers. Massive stems and foliage.
Caprice. Satiny pink, striped white and carmine.
Coquette des Alpes. White, tinged blush, medium-sized flower, semi-cupped in form, a fine variety. Almost everblooming. Very long stems, fine for cutting.
Duke of Edinburgh. Bright vermilion.
Eugene Furst. Velvety crimson, very large.
Fisher Holmes. Dark velvety crimson.
Francois Levet. Cherry rose, bright and distinct.
Gen. Jacqueminot. Brilliant crimson. The most widely popular Rose, better known perhaps as "Jack" Rose.
Gen. Washington. Red, shaded crimson and carmine.

John Hopper. Bright rose with carmine centre.
Louis Van Houtte. Crimson maroon, full and halfglobular. One of the hest of the dark-colored Roses.
Margaret Dickson. White, with pale, flesh centre.
Marie Baumann. Crimson vermilion, suffused carmine. Magna Charta. Dark pink, one of the best Roses.
Mme. Gabriel Luizet. Light satiny pink, an attractive sort. Very free blooming, a fine garden Rose.
Merveille de Lyon, Extra large, blush white.
Mrs. John Laing. Rich, satiny pink, delicious fragrance. Paul Neyron. Flowers 5 inches across; lovely dark pink. Persian Yellow. Hardy yellow Rose; best of its color. Prince Camille de Rohan. Dark crimson maroon.
Roger Lambelin. Crimson striped white. Very unique.

\footnotetext{
Price for the above, strong 2 -year-old plants, budded low on Manetti stocks, pot grown, 50 c . each, \(\$ 4.50\) per doz.
}

\section*{THE CRIMSON RAMBLER ROSE.}

\section*{Plants from open ground ready October 20th.}

This grand Rose improves upon acquaintance. The better it is known the more popular it becomes. It is of rapid, vigorous growth; plants in our grounds attained a height of fiftern feet the past season. The flowers are produced in trusses, pyramidal in shape, good specimens measuring nine inches from base to tip, and seren inches across, fairly covering the plant from the ground to the top, so that it is one mass of glowing crimson. The color is superb and remains strong and vivid to the end; plants in our grounds retained the bloom for two months. The profusion of bloom is marvelous, over three hundred blooms having been counted on one shoot.

\section*{THE YELLOW RAMBLER.}

\section*{(AGLAIA.)}

This promises to supply that " long-felt want," a double yellow hardy climbing Rose, a thing which has been sought after the world over. It is perfectly double, very fragrant, entirely hardy, having withstood, unprotected, a prolonged temperature of from zero to two degrees below. It is related to the Crimson Rambler, and, like it, blooms - large trusses, often bearing from 120 to 150 flowers in a cluster. The flowers last three to four weeks without fading. It is a very vigorous grower, making shoots 8 to 10 feet in one season when well established, so that it possesses all the requisites for unbounded popularity.

\section*{THE WHITE RAMBLER. (thalla.)}

This variety, Thalia (the White Rambler), is a fitting companion for the Crimson Rambler, closely resembling it in vine and foliage, as well as in the great clusters of pure white flowers, which are deliciously tragrant. The flowers remain on the plant a long time-from three to five weeks-and keep a long time when cut. The plant is perfectly hardy, equal in this respect to the Crimson Rambler, and where one is planted the other should be also. By growing this in a pot and training it to a pyramidal trellis, a fine plant may be had in bloom for Easter.

\section*{THE PINK RAMBLER.}

\section*{(EUPHROSYNE.)}

This beautiful variety is fit to rank with the two above mentioned. It is from the same source as the White Rambler, fully the equal of both in hardiness, vigor, size and profusion of flowers and blooming qualities.
Price, for the four " Ramblers" above, 30c. each, \(\$ 3.00\) per doz. Young plants from pots, now ready, 10c. each, \(\$ 1.00\) per doz.
. . . SPECIAL . . .
The four "Ramblers," \(\$ 1.00\); young plants, 35 c .

\title{
HARDY CREEPING ROSES, FOR GROWING ONTHE GROUND
}

\section*{The Memorial Rose.}

\author{
(Rosa Wichuraiana.)
}

The grandest plant for cemetery decoration in existence. It grows flat on the ground, like an ivy, and blooms in grand abundance throughout July and intermittingly the balance of the season, pure white, sweetly fragrant flowers, with a golden yellow disc. It is perfectly hardy, and if planted this fall should bloom next season. Price, strong plants from open ground, 40c. each, \(\$ 4.00\) per doz. Young plants from pots, now ready, 15 c. each, \(\$ 1.50\) per duz. Ready October 20th.

\section*{Double White "Memorial Rose."}

\section*{(Manda's Triumph.)}

Blooms in clusters of from 12 to 18 flowers on each, literally covering the plant. This variety is valuable for all purposes, whether for trailing on the ground for cemetery use, growing on fences and gate posts, boundary walls, or as specimens in pots or tubs. (See prices next column.)

\section*{Double Pink "Memorial Rose."}
(Universal Favorite.)
A fitting companion to the above; identical in growth, but with perfectly formed double flowers \(11 / 2\) to 2 inches in diameter, of a soft, light pink, and very fragrant.

\section*{South Orange Perfection.}

Double flowers, soft blush changing to white, about 11/2 inches in diameter. This is a very pretty variety and entirely distinct from the others.

\section*{Pink Roamer.}

The flowers are single, over 2 inches in diameter, a bright, rich pink, with a large, silvery-white centre and orange red stamens, producing a most charming effect. Very fragrant.

Price for the above, except where noted, 30c. each, \(\$ 3.00\) per doz. Plants from open ground ready October 20th.

Young plants, now ready, 10c. each.
SPECIAL.-Set of five creeping Roses above from open ground, \(\$ 1.25\); young plants, 50c.

\section*{CHINESE PRIMROSE} For win ter flowers there is no more desirable plant than the Chinese Primrose. They are easily grown and flower incessantly throughout the winter. Our plants comprise all the shades of crimson, pink, white and variegated. 1 st size, 25 c . each, \(\$ 2.25\) per doz. ; 2d size, 15 c . each, \(\$ 1.50\) per doz. (See cut.)

\section*{THE "BABY" PRIMROSE.}

A very attractive variety, blooming most profusely during the winter and spring, in fact it blooms continuously for nine months. The sprays of rosy lilac flowers are very graceful and exceedingly useful for cut flowers. It is easily grown in the house. Price, 25 c. each, \(\$ 2.25\) per doz.

\section*{PRIMULA OBCONICA.}

A favorite pot plant for house and conservatory culture on account of its wonderful blooming qualities, flowering nearly all the year through. Price, 25c. each, \(\$ 2.25\) per doz.
New Hardy White Pink, "rajesty."
Low growing, with flowers of the purest white, as large as a Carnation, rich Clove fragrance. Price, 25c. each, 5 for \(\$ 1.00\); 12 for \(\$ 2.00\).

\section*{VIOLET, MARIE LOUISE.}

The well-known winter-flowering, double purple variety. We offer strong, healthy plants, so that any amateur should have no difficulty in growing them. 15c. each, \(\$ 1.50\) per doz., \(\$ 10.00\) per 100 .

\section*{H \\ ARDY ENGLISH VIOLET}

Entirely hardy, double, a deep violet color and most deliciously fragrant. It is for spring blooming only. (See cut.) Price, 1 st size clumps, 35 c. each, \(\$ 3.50\) per doz., \(\$ 20.00\) per 100 ; 2d size, 15 c . each, \$1.50 per doz., \(\$ 12.00\) per 100 .

\section*{SINGLE VIOLET, CALIFORNIA.}

Large, deep purple, fragrant flowers. 15 c . each, \(\$ 1.50\) per doz., \(\$ 10.00\) per 100 .

\section*{OTAHEITE ORANGE.}

A dwarf Orange, which bears a profusion of fragrant flowers and edible fruit. One of the most effective plants for the house. Price, large plants, 50c. each. Young plants, 15 c . each, \(\$ 1.50\) per doz.

\section*{LARGE=FLOWERING PANSIES.}

These are from seed of our own saving, and we can unhesitatingly recommend them either for winter or spring blooming. 5c. each, 50 c . per doz., \(\$ 3.50\) per 100 .

\section*{SMILAX VINES.}

Familiar to every one. Easily grown if trained to strings. 10c. each, 75 c . per doz., \(\$ 4.00\) per 100 .

\section*{SPIRAEA, ANTHONY WATERER.}

Well adapted for edging shrubbery, forming a low, bushy plant, rarely exceeding 12 inches. Flowers rich crimson, borne in dense, flat clusters from early summer to frost. It will prove of great value for pot culture. Price, 30c. each, \(\$ 3.00\) per doz.

\section*{HARDY CLIMBING VINES. \\ Ready Oct. 20th.}

Ampelopsis Veitchii. (Sometimes called "Boston Ivy" and 'Japan Ivy.") Clings closely to brick, stone or wood work.
A. Quinquæfolia. The Old Virginia Creeper.

Akebia Quinata. Dark brown flowers. Fragrant.
Aristolochia Sipho. (Dutchman's Pipe.) 50c. each, \(\$ 4.50\) per doz. Bignonia Grandiflora. Scarlet Trumpet Vine.
Honeysuckles. Yellow, coral or scarlet, white, pink, evergreen and golden leaved; fine plants.
Ivy, English. Evergreen. Large foliage.
Jasminum. (Officinalis.) Hardy White Jasmine.
Jasminum Nudiflorum. Hardy Yellow Jasmine.
Wistaria Sinensis. White. 50c. each.
Wistaria Sinensis. Soft lavender blue. 35c. each.
All of the above Fardy Climbing Plants at 25 c . each, \(\$ 2.25\) per doz., except where otherwise noted.

\title{
Hardy Ornamental Flowering Shrubs DECIDUOUS AND EVERGREEN.
}

\author{
For Borders, Massing or Single Specimens. For Hedges. For Cemeteries. For Pleasure Grounds. For Door Vards or Large Private Estates.
}

\author{
READY FOR DELIVERY ABOUT OCTOBER 20th.
}

\begin{abstract}
Below we offer a carefully selected list of hardy shrubs, to which we invite special attention. They are all 3 to 4 jears, transplanted, and range from 2 to \(31 / 2\) feet in height according to variety; some, being stronger growing, are consequently taller at the same age. The letters following the names indicate the season of blooming, thus: A, April blooming; B, May; C, May and June; D, June; E, June and July; F, June to October; G, July to October; H, July and August; I, August and September. A few bloom continuously from spring until frost, as told in the descriptions.
\end{abstract}

Althea, Double White. (I) Beautiful shrub; double flowers. The well-known "Rose of Sharon."
Althea, Double Red. (1) Similar to above, color red.
Azalea, Hardy. (c) Assorted colors. \(\$ 1.00\) each.
Berberis Purpurea. (c) (Purple Berberry.) Very pretty purple foliage, desirable for massing with other shrubs.
Berberis Thunbergii. (c) One of the handsomest shrubs In cultivation, brilliant red berries in fall and winter.
Calycanthus Floridus. (D) Strawberry-scented shrub.
Cercis Canadensis. (B) (American Judas Tree.) A small, very ornamental flowering tree, bearing a profusion of light pink flowers. A very attractive shrub.
Chionanthus Virginica. (c) (White Fringe.) White, fringe like flowers, completely covering the bush. Large, grape-like, purple berries in late summer.
Clethra Alnifolia. (I) (Sweet Pepper Bush.) A useful shrub, covered with upright spikes of yellowish white, sweet-scented flowers. Grows well in shady places.
Corchorus Japonica. (G) Slender growth; yellow flowers.
Corchorus Jap. Alba. (G) Similar to the above, but bears pure white flowers; very ornamental.
Corchorus Jap. Var. (G) Another variety of the preceding, with leaves prettily variegated white and green.
Cornus Floridus. (D) (Dogwood.) An interesting species with pure white flowers, followed by showy fruit; symmetrical growth, growing twelve to thirty feet.
Deutzia Candida fl. pl. (E) Double white flowers; a well-known and valuable shrub.
Deutzia Crenata. (E) Pure white, tinged rose color.
Deutzia Gracilis. (D) Pure white, low compact habit.
Deutzia Lemoineii. (E) A fine and improved variety, the branches covered with erect panicles bearing 15 to 25 large, pure white, well-opened flowers.
Ezochorda Grandiflora. (B) Pure white flowers.
Forsythia Suspensa. (A) (Weeping Forsythia.) A shrub resembling the above in its flowers, drooping habit.
Forsythia Viridissima. (A) Yellow sprays of flowers.
Hedysarium Multijugum. (A) Blooms continuously from spring until frost. Flowers deep violet red, in clusters 1 to \(1 \frac{1}{2}\) feet long. A most beautiful and novel shrub, growing five to six feet high. Price, 50c. each.
Hypericum Moserianum. (F) A low-growing graceful shrub covered with large bright yellow flowers from June until frost. Very satisfactory shrub.
Hydrangea Paniculata Grandiflora. (I) Large white panicles of flowers, changing to pink at the base, gracefully drooping with its wealth of bloom. Used largely in cemeteries. Large bushes, \(21 / 2\) to 3 ft ., 50 c. each.
Kerria Japonica. (G) Double yellow flowers.
Philadelphus Coronarius. (D) The popular "Mock Orange." Pure white, fragrant flowers.
Philadelphus Foliis Aureus. (D) Very ornamental, bright yellow foliage, white flowers, very graceful.
Philadelphus Lemoineii. (D) A vastly improved variety, very large sweetly fragrant flowers.

Prunus Pisardi. (Purple-leaved Plum.) Foliage, fruit and shoots of bright purplish red.
Prunus Triloba. (B) (Double-flowering Plum.) Large, pink flowers, very double. A very attractive shrub.
Pyrus Japonicus. (A) (Japan Quince.) Scarlet flowers.
Rhododendrons. (c) The grandest of hardy evergreen shrubs, in flower and foliage. Colors, rose, crimson, pink, white, lilac, purple and variegated. Plants with 8 to 10 buds, \(\$ 1.50\) each; 10 to 15 buds, \(\$ 2.00\) each.
Sambucus Aurea. (Golden-leaved Elder.) The finest golden-leaved shrub, and invaluable for producing strong effects in grouping.
Spiræa Bumalda. (F) Large flat heads of rosy pink flowers, dwarf compact habit.
Spiræa Callosa. (F) (Superba.) Large flat clusters of pink flowers borne freely. A grand hardy shrub.
Spiræa Douglasi. (H) A beautiful variety bearing spikes of beautiful rose-colored flowers.
Spiræa Thunbergii. Of dwarf habit and graceful form; flowers small, white, appearing early in spring.
Spiræa Prunifolia. (c) (Bridal Wreath.) Pure white double flowers completely covering the branches.
Spiræa Van Houtteii. (D) Flowers pure white, borne in greatest profusion; one of the best in its class.
Syringa. (Lilac.) (B) The purple sweet-scented variety.
Syringa Persica Alba. (B) (The White Persian Lilac.) Beautiful sprays of white flowers; slender, graceful growth. A grand plant for cemetery. 35c. each.
Tamarix Gallica. (c) (Weeping Beauty of the Forest.) Slender, graceful habit, covered with pretty pink flowers. Fine for the seashore.
Viburnum Opulus. (D) (Common Snowball.) Large, white flowers, scarlet berries late in fall and winter.
Viburnum Plicatum. (D) (Japan Snowball.) Superior in foliage and flower to the above. An exceedingly handsome shrub. Price, \(21 / 2\) to 3 ft ., 50 c. each, \(\$ 4.50\) per doz.; 12 to 18 inches, 30 c. each, \(\$ 3.00\) per doz.
Weigelia Candida. (F) Pure white flowers.
Weigelia Rosea. (E) Rich rose-colored flowers.
Weigelia Rosea Var. (E) A variety bearing rose-colored flowers with beautifully variegated foliage.
Xanthoceras Sorbifolia. (C) Blooms in upright spikes, flowers bell-shaped, over an inch across, pure white, the centre rich reddish brown. Foliage somewhat like a Mountain Ash. 50c. each.

\section*{Hedge Plants.}

Arbor Vitae. (American.) The best evergreen for making a close symmetrical hedge. Price, 2 to \(21 / 2\) feet, \(\$ 15.00\) per 100; \(\$ 2.00\) per doz.
Privet. (Californian.) A splendid hedge plant; glossy green foliage, white flowers. Price, \(\$ 1.00\) per doz., \(\$ 6.00\) per \(100,21 / 2\) feet high. 2 feet high, \(\$ 4.00\) yer 100 .
 (By Mr. Charles henderson.)
A set of complete instructions, in pamphlet form. We will send this free to customers applying for it when they order plants.

\section*{BLAGKBERRIES.}
(Ready October 20th.)
RATHBUN. The plant is very vigorous, branching naturally, producing fruiting canes very freely and an abundance of large, luscious fruit. It "suckers" but slightly, the roots are strong and branching, penetrating deeply into the soil, a valuable characteristic in dry seasons and locations. The fruit is very large and handsome, intense black with a very high polish and without any hardcore, juicy, high-flavored; of so superior a quality that it is in a class by itself. Those accustomed to the old varieties would scarcely recognize it for a Blackberry. For table use, for canning or for culinary purposes it is equally desirable. It literally melts in the mouth. Price, 20 c . each, 6 for \(\$ 1.00,12\) for \(\$ 2.00,25\) for \(\$ 3.50,50\) for \(\$ 6.00,100\) for \(\$ 10.00\).
ERIE. The canes are of ironclad hardiness, strongest growth, free from all diseases, and wonderfully productive. The berry is of the very largest size, of excellent quality. (See cut.) 60c. per doz., \(\$ 4.00\) per 100.

\section*{GURRANTS.}
(CANNOT BE MIAIED.)
(Ready October 20th.)
FAY'S PROLIFIC. This is decidedly the best Red Currant we have. It has been widely planted and has given general satisfaction. The bush is a strong grower, wonderfully prolific, and comes into bearing early. Fruit large, bright red, and of good flavor, and less acid than Cherry, which it is rapidly superseding. \(\$ 1.50\) per doz., \(\$ 10.00\) per 100 . (See cut.)
LARGE RED CHERRY. A popular market sort. Bunchés large, berries very large, bright, sparkling crimson, beautiful, very acid. 2 -year, \(\$ 1.00\) per doz., \(\$ 6.00\) per 100 .
WHITE GRAPE. The largest and decidedly the best white variety, and one of the best of any for the home garden. Bunch large and long; berry large, handsome, translucent white and of best quality, being less acid than others. 2yr., \(\$ 1.00\) per dz., \(\$ 6.00\) per 100.
BLACK CHAMPION. A fine Black Currant and a general favorite. \(\$ 1.00\) per doz., \(\$ 6.00\)

\section*{per 100 . \\ Red \\ RASPBERRIES}
(Ready Oct. 20th.) If wanted by mail, add 10c.pr. dz. MILLER. The Miller is as vigorous and sturdy in cane as the Cuthbert and Marlboro, as early as Thompson's Early Prolific. Beautiful and brilliant color, and in sweet, luscious flavor and hardiness fully equal to Turner-just what we have all been wanting so long but never obtained until now. Price, 10 c. each, 3 for 25 c ., 75 c. per doz., \(\$ 4.00\) per 100.
THOMPSON'S EARLY PROLIFIC. A fine early Red Raspberry for general cultivation. Anexcellent grower; canes hardy. Berries are medium to large, bright crimson, very productive.
CUTHBERT. The leading market varlety. Canes hardy, large, healthy foliage, and exceedingly productive. Berries large, dark crimson, quite firm and of good flavor. Season late. (See cut.)
MARLBORO. The largest of the early red raspberries, ripening a few days later than Hansell. Canes hardy and productive. Fruit exceedingly large, bright crimson, fine quality.
TURNER. (Southern Thornless.) Very desirable as an early sort for the home garden. Berries of good size, bright crimson. Price (except where noted), 50c. per doz., \(\$ 2.50\) per \(100, \$ 20.00\) per 1,000 .
Early Harvest. The berries are of large size, very uniform and of a bright glossy blackness. For the South its value can scarcely be overestimated.
Kittatinny. The berries are large, handsome and of delicious flavor; canes of strong, erect growth and productive. Season medium to late.
Wilson Junior. It possesses all good qualities, combining size, earliness and productiveness.
DEWBERRY, Lucretia (or Creeping Blackberry), conceded to be the finest of its class, as early as Early Harvest and as large as the Erie Blackberry. The quality is superb, juicy and melting.
Price for any of the above (except where noted), 50 c. per doz., \(\$ 2.50\) per \(100, \$ 20.00\) per 1,000 . If wanted by mail, add 10 c . per dozen.
YELLOW RASPBERRY, Golden Queen. The most popular and best Yellow Raspberry yet introduced. Of large size, great beauty, high quality, hardiness and productiveness. Fully equal to Cuthbert in size of fruit and vigor of growth.
Price, 50 c . per doz., \(\$ 2.50\) per \(100, \$ 20.00\) per 1,000 , by express or freight, buyer to pay charges. If wanted by mail, add 10c. per dozen.

\title{
STRAWBERRY PLANTS. \({ }^{\text {POT }}\)
}

Space will not permit us to give descriptions of the numerous varieties which we offer, all of which are fully described in our Strawberry Catalogue, a copy of which may be had upon application by any who did not receive it.
Ground Layers we can supply, if wanted, after October 25th, at half the rates quoted in that catalogue.

\section*{GOOSEBERRIES. \\ (Ready October 20th. \\ Cannot be mailed.)}

\begin{abstract}
Houghton. A vigorous variety, not much affected by mildew. 2year plants. 75c. per doz., \(\$ 5.00\) per 100 .
Downing. The best of the American sorts and a vast improvement upon the Houghton, of which it is a seedling. Fruit large, pale green, and of excellent quality, both for cooking and table use. Bushes stocky, vigorous, hardy, very prolific. 2-year plants, 10 c. each, \(\$ 1.00\) per doz., \(\$ 7.50\) per 100 .
\end{abstract}

\section*{BLACK RASPBERRIES. "cAps."}
(Ready October 20th. If wanted by mail, add 10c. per doz.)
Palmer. Very early, grand for either family or market, vigorous and hardy, with healthy foliage; wonderfully productive. (See cut.)
Ohio. Exceedingly productive, very hardy and free from disease; berries of good size, jet-black and of excellent quadity.
Gregg. A popular market sort. Canes of strong, vigorous growth; berries very large, covered with heavy bloom, firm, meaty, and of fine flavor. It responds liberally to generous treatment.
Shaffer's Colossal. Canes are of wonderful vigor and size, hardy and enormously productive. Berries large, luscious, rich, sprightly flavor.
Souhegan, or Tyler. A ver'y early Blackcap, and the leading early market sort, Canes vigorous and hardy, wonderfully productive. Fruit of good size, jetblack, with but little bloom ; firm, sweet and pleasant.
All the above (except where noted), 50 c. per doz., \(\$ 2.50\) per 100, \(\$ 20.00\) per 1,000 .

\section*{HARDY GRAPES IN VARIETY. (Ready October 20th.) (All two-year vines.)}

Agawam. Berries large, of bronze color. 25c. each, \(\$ 2.50\) per doz.
Brighton. The best grape in its color for table use. Bronze-black; ripens with the Delaware. 25c. each, \(\$ 2.50\) per doz.
Concord. Bunch and berries large, color black. 20c. each, \(\$ 2.00\) per doz.
Delaware. Red; bunches compact, berries small and sweet. 25c. each, \(\$ 2.50\) per doz.
Eaton. This fine Grape is similar in foliage to Concord, and in growth, health, hardiness and quality is in every respect its equal, while in size of bunch and berry it is much larger and more attractive in appearance. 30 c. each, \(\$ 3.00\) per doz.
Gærtner. A beautiful light red, almost transparent, sweet, tender,
sprightly and pleasant. 25e. each, \(\$ 2.50\) per doz.
Golden Pocklington. Very large, deep amber in color. One of the most attractive grapes grown. 25c. each, \(\$ 2.50\) per doz.
Lindley. Berry medium to large; color, a rich shade of red, rendering it a very attractive grape. 25c. each, \(\$ 2.25\) per doz.
Moore's Diamond. In vigor of growth, color and texture of foliage, with hardiness of vine, it is the equal of its parent " Concord," while in quality the fruit is equal to many of our hothouse grapes. It is amongst the earliest and ripens from two to four weeks ahead of "Concord." (See cut.) 30c. each, \(\$ 3.00\) per doz.
Moore's Early. Resembling the "Concord" in style of growth and berry; ripening two weeks earlier. 30 c . each, \(\$ 3.00\) per doz.
Martha. Greenish white; exquisite flavor. 20c. each, \(\$ 2.00\) per doz.
Merrimack. Large berry; jet-black. 25c. each, \(\$ 2.50\) per doz.
Niagara. A grand white grape. 25c. each, \(\$ 2.50\) per doz.
Salem. A splendid coppery red grape, ripening with "Concord," tender, juicy; one of the very best. 25 c . each, \(\$ 2.50\) per doz.
Worden. Black. Large size, early. 25c. each, \(\$ 2.50\) per doz.
Wilder. Bunches large; color black. 25c. each, \(\$ 2.50\) per doz.

\section*{FOREIGN GRAPE VINES.}

Black Hamburg, Muscat of Alexandria, Bowood Muscat, Maddresfield Court, Mrs. Pince's, Barbarossa, Muscat Hamburg, Buckland's Sweet Water. Strong two-year vines. \$1.50 each, \(\$ 15.00\) per doz.

\section*{RHUBARB ROOTS. (Ready October 2oth.)}

St. Martin's. It is not only immensely productive, but it is also one of the earliest, and, above all, it has a rich spicy flavor, very similar to the gooseberry. 20c. each, \(\$ 2.00\) per doz.
Linnæus. The standard variety. 15c. each, \(\$ 1.50\) per doz.

\section*{EXCEPT WHERE NOTED.}

\section*{HENDERSON'S PALMETTO ASPARAGUS ROOTS.}

\section*{(Ready in November for the South, and in March and April for the North.)}

Early, large, tender, delicions. The finest Asparagus grown. The Palmetto is not only much earlier, but is also a better yielder, and is more even and regular in its growth than any other variety, and must eventually supplant all older sorts. Average bunches containing fifteen shoots measure \(131 / 2\) inches in circumference, and weigh about two pounds. The Palmetto has now been planted in all parts of the country, and it has been proven equally well adapted for all sections North and South. Its quality is unequaled. (See cut.)

Palmetto. Asparagus roots (a saring of one to two years is effected by planting roots). Splendid two-year-old. \(\$ 1.50\) per 100 , \(\$ 10.00\) per 1,000 . 50 roots at 100 rate; 500 at 1.000 rate. If to be sent by mail, add 40 cents per 100 to the prices.

\section*{hendersons "EARLY SNOWBALL" cauliflower.}

FAMOUS THE WORLD OVER.

\section*{Beyond Question THE BEST Cauliflower}

\section*{FOR EITHER EARLY OR LATE, FOR FAMILLY OR MARKET GARDEN, FOR FORCING OR COLD FRAMES.}

IT HEADS WHERE OTHERS FAIL.
Those who have never succeeded before should grow "HENDERSON'S SNOWBALL."
It is hardly necessary for us to describe this variety at all as its name has now become a bousehold word wherever this delicious vegetable is grown. Snowball Cauliflower is the standard everywhere for quality with the seedsman, the market gardener and the amateur. While originally recommended and used as an early variety, it has not only supplanted all other sorts for early spring planting, but it has largely driven out the large late sorts for fall use, being much finer in quality, and the only Caulifower that is absolutely certain to head when the conditions are right, forming a perfect snow-white head, averaging nine inches in diameter.
HENDERSON'S EARLY SHOWBALL CAULIFLOWER is superior to all others. It is the earliest of all Cauliflowers. Its elose-growing, compact habit enables one-third more to be planted on the same space of ground than can be done with any nther variety. For forcing under glass during winter and spring, this Early Snowball variety is peculiarly well adapted, from its dwari prowth and khort outer leaves, and for this purpose no other Cauliflower is now go largely grown. (See cut.) Price, 25 c . per pkt., \(\$ 4.00\) per oz., \(\$ 14.00\) per \(1 / 4 \mathrm{lb}\).

\title{
\(=\) = HENDERSON'S = = "Early Spring " Cabbagie.
}

\author{
A New Extra Early Cabbage, with a Round Flat Head, coming in with the Wakefield.
}

The most valuable early Cabbage ever introduced. The variety is of Early Summer type, but about one-fifth smaller, having only four or five outside leaves, and these so small, and growing so near to the head, that It may be successfully planted twenty-one incher apart, as close as any variety we know of. But its great value lies in the fact that it is the only first Farly Flat Cabbage. It possesses wonderful uni. formity in shape, being round, slightly flattened at top of head. Stem is short and extends but little into the head; this feature is valuable, as it makes almost the entire head edible. The veining of the leaves is particalarly fine, in which respect it shows its finely bred character, being entirely free from any coarseness whatever. There is no Cabbage we know of having a more solid head; but, added to this, it has the pecullarity of heading firmly at an early stage in its grow th, so that the finest Cabbage, though small, can be obtained long before it has attained its mature size. It is entirely free from any rankness of flavor. (See cut.) Price, 15 c . per pkt., 60 c . per oz., \(\$ 2.00\) per \(1 / 4 \mathrm{lb}\)., \(\$ 6.00\) per 1 b .
henderson's early jersey wakefield cabbage.

\section*{Selected Early Jersey Wakefield. \\ ORIGINAL STOCK. THE STANDARD EARLY CABBAGE}

The merits and characteristics of the Early Jersey Wakefield Cabbage are nowso well known as to hardly need repeating here; still asour catalogue annually falle in to the hands of thousands who havenot before seen it, we may state that it is universally considered the best early Cabbage in cultivation. Among its merits may be mentioned its large size of head for an early sort, small outside foliage, and its uniformity in producing a crop. The heads are pyramidal in shape, having a blunted or rounded peak. Our seed of this famous Cabbage is very choice, being sared from selected fine hard heads. (See cut.) Price, 5c. per pkt., 25c. per oz., 80 c . per \(1 / 4 \mathrm{lb}\)., \(\$ 2.75\) per lb .
'Had Peter Henderson done nothing else but introduce the Early Wakefield Cabbage, it would be a lasting monument to biss name. No better variety is in cultivation to-day among the early kinds."-Country Gentleman.

\section*{THE CHARLESTON}

OR LARGE TYPE
OF WAKEFIELD.
For some years past customers have requested us to procure for them, if possible, a Cabbage which had all the characteristics of the Early Jersey Wakefield but of a greater size. With this in view, we carefully selected from one of our best stocks of Wakefield a larger type, which is now so fixed in its character that we cean offer itwith confidence to those desiring a Cabbage of this kind. This selection will average about 50 per cent. larger in size than the old type of Wakefield, and is only two or three days later. Price, 10 c. per pkt., 35 c . per oz. \(\$ 1.00\) per \(1 / 41 \mathrm{lb} ., \$ 3.50\) per 1 lb .

Henderson's Succession Cabbage.
IS POSITIVELY THE
FINEST CABBAGE IN EXISTENCE,

\author{
Whether for Medium Early, Main Crop or Winter use. PERPECT in every respect.
}

The Succession Cabbage we consider one of our most valuable contributions to horticulture. It would be classed as a second early, coming in a few days later than Early Summer, but it is immeasurably superior to that variety; it is of nearly double thesize and is absolutely true to its type under allconditions. In addition to this, it has no tendency whatever to run to seed. We can say without exaggeration that it is the finest Cabbage in existence to-day; whether for medium early, main crop orlate use it has no equal. It is so finely bred and so true to type that in a field of twenty acres every head appears alike. We can recommend it either for the market gardener, trucker or private planter, as it is a perfect cabbage in every respect, not only being of the largest size, but of handsome color and of the finest quality. Itis probably the safest variety for an amateur to plant, as it doeswell at all seasons, and one is almost sure of getting a crop, no matter when it is planted. Our stocks of Cabbage of all varieties have for years been the acknowledged standard of excellence in this country, and when we state that we consider Succession to be the most valuable variety that we have ever introduced, our opinion of its great merit will be apparent to all. (See cut.) Price, 10 c . per pkt., 35c. per oz., \(\$ 1.00\) per \(1 / 4 \mathrm{lb}\), \(\$ 3.50\) per 1 b .

HENDERSON's SECCESBION CABBAGE.

\author{
ASPARAGUS ROOTS. \\ (Ready in November for the South, in March and April for the North.)
}

If to be sent by mail, add 40 cts . per 100 to the prices.
The Palmetto. Splendid roots. \$1.50 per 100, \(\$ 10.00\) per 1,000. (50 roots at 100 rate; 500 at 1,000 rate.)

Colossal. Fine two-year-old roots at \(\$ 1.00\) per 100, or 86.00 per 1,000 . ( 50 roots at 100 rate; 500 at 1,000 rate.)

\section*{BEANS, Dwarf Green Podded.}

\section*{... THE ... \\  \\ LAWN \(G_{\text {RASS }}^{\text {Sebd. }}\)}

Our Lawn Grass, sown in the Autumn, will produce a fine, luxuriant Lawn EARLY the following season.

\section*{The "Henderson" Lawn Grass Seed}
is the best lawn seed for our American climate. It is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained, rivaling the famous lawns of Old England. The "Henderson" Lawn Seed is the result of several years' careful experimenting, and is unequaled. We have made the formation oi perfect and permanent lawns a study for years, and the finest lawns in this country prove our ability.

\section*{The beautiful lawns at the
WORLD'S FAlr in chicago. HENDERSON' LAWN \\ We produced in six weeks' time by sowing our GRASS.}

Not one of the charmiug features at the Exposition was so universally admired as our "setting of emerald velvet," which, notwithstanding the long-continued drought of the summer, retained its verdure throughout the entire season. Besides being the only lawn grass seed granted a medal, we exhibited the separate grasses used in the mixture and received Seven Awards for superior quality and purity of sample, The "Henderson" Lawn Grass Seed is, relatively speaking, the cheapest seed offered, because, while the lawn grass mixtures of other seedsmen will not average over 14 lbs. to the bushel, this weighs from 20 to 21 lbs . per measured bushel.
\(*\) * THE QUANTITY REQUIRED. * *
The quantity required for making new lawns is 5 bushels per acre, or for renovating old lawns 1 to 2 bushels. For a plot \(15 \times 20\), or 300 square feet, 1 quart is required for new, or 1 pint for renovating old lawns. Full priuted instructions nn everv package azd bag.

PRICES: Per qt., 25c.; per peck, \(\$ 1.50\); per bush., \(\$ 5.00\). (If by mail, add at the rate of 5 c . per quart for postage.)

\section*{"SHADY NOOK"} LAWN GRASS.
On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be ao further difficulty.

Price, \(35 \mathrm{c} . \mathrm{qt},. \$ 2.00 \mathrm{pk}\), , \(\$ 7.00\) bushel of 20 lbs . (If by mail, add at the rate of \(\overline{5}\) e. per qt. for postage.)

\section*{HENDERSON'S "GOLF LINK" \\ GRASS SEED.}

We have given much attention to grasses for golf links, and the best links in the United States and Canada to-day show our success
When golf first became popular one of our representatives visited several of the famous scotch links and found that most of the grasses which formed these links can be grown here. The mixtures we offer below are largely composed of such imported varieties as will thrive here, with the addition of several equally fine American varieties. By the use of these mixtures, and with proper care and attention, the finest golf links and putting greens in the world can be successfully rivaled.
Grass Mixture for "Putting Greens '-Price, \(30 \mathrm{c} . \mathrm{qt} ., \$ 1.75 \mathrm{pk} ., \$ 6.00\) bush. of 20 lbs.
Grass Mixture for outlying grnunds or "F'alr" Greens"-Price, \(\$ 2.50\) bush. of \(1+\) ibs.

\section*{Special Grass Mixtures}

\section*{What Our Customers Say:}

\section*{IN MAINE.}

I did not succeed in getting four tons or more per acre, but I did get more than from anything
else, and it is splendid hay.-G. M. HoLaEs.

\section*{IN NEW JERSEY.}

The Special Grass Mixtures have been most successful, in spite of an unusually trying seagreat per acre as the timothy, which \(I\) souced
alongside at the same time. -R . V . Lindabory.

\section*{IN IOWA.}

Four Grass Mixt ure has done exceedingly well, especially in this year of drought. It yielded about twice as much astimothy, and cattle seemed
to do better on it.-W. WArson.

IN NEW YORK.
Your Permanent Mixture is the finest piece of
grass anywhere about here. An old farmer told grass anywhere about here. An ola farmer told
me last weef it uould cut \(31 / 2\) tons to the acre sure.-J. M. Richards.

IN VERMONT,
Your Grass Seeds are easily the best of any in the market.-F. C. Kimball.

IN PENNSYLVANIA,
The Permanent Pasture Grass was a perfect success. We never had such a good yrela of grass. He monced our meadous - Wrice. \& Stons \& Sons. The green appearance of the fielt attracted universal attention. It has far surpassed clover
and timothy in the amount it yields.

\section*{IN VIRCINIA.}

My manager is enthusiastic over your mixture for Hay and Permanent Pasture. He claims this year he cut 3 tons per acre the first cutting. \(1 \%\)
tons the second, and will cut 2 tons the thirl. The field is a grand sight; people come for miles around to see it.-EDward E. Barney.

\section*{IN INDIANA.}

Four Grass Seed produced the largest crop of hay I ever saw, and has yielded a most excellent pasture ever since, notwithstanding the extraordinary drought in this vicinity.-R. S. TAYLOR.

\section*{IN OHIO.}

The Special Grass Mixture has given us the very best of satisfaction: it produced the finest piece amount of hay and pasture per acre - W. J. Hayes,

\section*{FOR MAY AND PERMANENT PASTURE.}

\section*{WILL LAST TWENTY YEARS WITHOUT RENEWAL.}

Consisting of the following varleties : Orchard Grass, Meadow Foxtail, Sheep's Fescue, Rhode Island or Creeping Bent, Hard Fescue, Sweet Scented Vernal (True Perennial), Meadow Fescue, English Rye Grass, Italian Rye Grass, Red Top, etc., as recommended in our book "H0W THE FARM PAIS," blended in proportions which, we have found from actual use, give the most satisfactory results.

On ordinary fertile soil three bushels of this mixture is sufficient to seed an acre, but where the land is poor a larger quantity will be necessary. Taking one soil with another a fair average would be three bushels to the acre.

For Hay and Permanent Pasture for Light soils,

To these mixtures, intended for either Mowing Lands or Pasture (but which on account of their greater weight should be sown separately), are to be added ten pounds of Mixed Clovers, comprising White, Mammoth, Perennial or Cow Grass, Alsike, Trefoil, etc., but these should only be sown in the spring, as they are rather tender in this latitude if sown in the fall.
```

OPINIONS OF
THE PRESS.

```

Conntry Gendeman says: "Below the taller grasses was a thick mat of finer kinds, and the close, rich turf hid every particle of soil." or "Timothy and Clover," or any one grass, costing but a little more, lasting much longer, and giring frequently more than double the yield." Farm and Home says : "The enormous yield of nearly four and one-half tons of good hay per acre should convince any one that more hay acd better pasture can be grown with mixtures than with Timothy and Clover alone, as under the very same conditions the latter yielded less than a ton and a half per acre"

How the Farm Pays says: "Far in advance not only of Timothy but of any other Grass we have thus far in cultivation.'

At our Farm one of these Mixtures yielded (first cutting, 5,888 Ibs.; second cutting, 4,320 lbs. per acre) a total of 10,208 LBS. CURED HAY PER ACRE, while Timothy growing alongside under same conditions yielded only one cutting of \(2,400 \mathrm{lbs}\). per acre.

\section*{HENDERSON'S "RECLEANED" GRASS SEEDS.}

\section*{FALL SOWING IS THE MOST SUCCESSFUL.}

Prices for Grass Seed are subject to fluctuations of the market. Those herein named are the prices ruling at this date (August), but we cannot be bound by them for any length of time. Write for prices.

Awnless Brome Grass, (Bromus Inermis.) A new forage plant of the utmost importance, particularly in dry and Southern sections; yields enormously. 20c. \(1 \mathrm{~b} ., \$ 16.00100 \mathrm{lbs}\).
Bermuda. (Cynodon Dactylon.) Valuable for Southern States, withstands the heat and drought. \(90 \mathrm{c} .1 \mathrm{~b} ., \$ 8.0010 \mathrm{lbs}\).
Creeping Bent Grass. (Agrostis Stolonifera.) Excellent for lawns, succeeds well in moist situations. About 2 bushels to the acre. ( 20 lbs . to bush.) \(25 \mathrm{c} .1 \mathrm{lb} ., \$ 4.50 \mathrm{bush},, \$ 22.00 \mathrm{I} 00 \mathrm{lbs}\).
Crested Dog's Tail. (Cynosurus Cristatus.) Should enter in moderate quantity in permanent pasture mixtures and lawns. (About 21 lbs . to bush.) 50c. 1b., \(\$ 10.00 \mathrm{bush} ., \$ 45.00100 \mathrm{lbs}\).
English Rye Grass, (Lolium Perenne.) A valuable grass. \(21 / 2\) to 3 bushels to the acre. ( 24 lbs. to bush.) \(10 \mathrm{c} .1 \mathrm{~b} ., \$ 2.00\) bush., \(\$ 7.00100 \mathrm{lbs}\).
Fine Ieaved Sheep's Fescue, (Festuca Ovina Tenuifolia.) (About 14 Ibs. to the bush.) \(35 \mathrm{c} . \mathrm{lb} ., \$ 4.25\) bush., \(\$ 28.00100 \mathrm{lbs}\).
Hard Fescue. (Festuca Duriuscula.) Dwarf, hardy grass, of great value for dry situations, indicates superior quality in hay. ( 12 lbs. to bush.) \(25 \mathrm{c} .1 \mathrm{lb} ., 2.50\) bush., \(\$ 18.00100 \mathrm{lbs}\).
Eungarian Grass. (Panicum Germanicum.) Is a valuable annual forage plant. I bush. to the acre. ( 48 lbs. to the bush.) \(10 \mathrm{c} .1 \mathrm{~b} ., \$ 1.40\) bush., \(\$ 2.75100 \mathrm{lbs}\).
Italian Rye Grass. (Lolium Italicum.) Unequaled for producing an abundance of early spring feed-giving quick and successive growthe throughout the season. ( 18 lbs . to the bush.) \(11 \mathrm{c} .1 \mathrm{~b} ., \$ 1.80\) kush., \(\$ 9.00100 \mathrm{lbs}\).
Johnson Grass. (Sorghum Halapense.) Of greatest importance for the South. Very tender and nutritious. \(14 \mathrm{c}, 1 \mathrm{~b}\), , \(\$ 3.00 \mathrm{bush}\). of \(25 \mathrm{lbs} \$\).11.00100 lbs .

Kentucky Blue Grass. (Poa Pratensis.) Very valuable for a variety of noils from moist to dry, furnishes delicious and Iuxuriant pasturage and makes excellent hay. ( 14 lbs . to bush.) Fancy or double extra clean. 15c. lb., \(\$ 1.75\)

bush., \(\$ 12.00100\) lbs.
MङADOW FBSCU及. (Festuca Pratensis.) Of great value for permanent pasture and hav, robust grower and nutritious. ( 221 bs , to the bush.) 15c. lb., \(\$ 2.75\) bush., \(\$ 12.00100 \mathrm{lbs}\).
IISADOW FOXTAIL. (Alopecurus Pratensis.) Resembles Timothy, but of much earlier and rapid growth, particularly valuable for permanent pastures and hay. ( 7 lbs.to bush.) (See cut.) \(30 \mathrm{c} .1 \mathrm{~b} ., \$ 2.10\) bush., \(\$ 28.00100 \mathrm{lbs}\).
ORCHARD GRASS. (Dactylis Glomerata.) One of the most valuable of all grasses, for either grazing or mowing, of early, rapid and luxuriant growth. (See cut.) ( 14 lbs to bush.) \(\$ 2.00\) bush., \(\$ 14.00100 \mathrm{lbs}\).
Red or Creeping Fescue, (Festuca Rubra.) Suitable for sandy seacoasts and dry soils. (About 14 lbs . to the bush.) \(25 \mathrm{c} .1 \mathrm{lb} ., \$ 2.75\) bush., \(\$ 18.00100 \mathrm{lbs}\).
Red Top Grass. (Agrostis Vulgaris.) ( 14 lbs. to bush.) \(\$ 1.00\) bush., \(\$ 7.00100\) lbs. Fancy recleaned silver seed. ( 32 lbs . to bush.) \(18 \mathrm{c} .1 \mathrm{~b} ., \$ 5.00\) bush., \(\$ 15.00 \quad 100 \mathrm{lbs}\).
Rhode Island Bent Grass. (Agrostis Canina.) A very fine variety for lawns. About 3 bush. to the acre. (Bush. of 14 lbs.\()\) 32c. \(1 \mathrm{~b} ., \$ 4.00\) bush., \(\$ 28.00100 \mathrm{lbs}\).

Rough Stalked Meadow Grass. (Poa Trivialis.) Valuable for pastures and meadows, particularly on damp soils. \(11 / 4\) bush. to the acre. (About 14 lbs. to the bush.) 45 c .1 b .
Sheep's Fescue. (Festuca Ovina.) Excellent for uplands and dry pastures, of close, dense and nutritive growth, relished by sheep. (12 lbs. to bush.) \(25 \mathrm{c} . \mathrm{lb} ., \$ 2.50\) bush., \$18.00 100 lbs.
Sweet Vernal Grass, True Perennial. (Anthoxanthum Odoratum.) Very aromatic, giving hay a fine flavor. ( 10 lbs. to bush.) \(70 \mathrm{c} .1 \mathrm{~b} ., 6.50 \mathrm{bush}\).
Tall Meadow Fescue. (Festuca Elatior.) Very early, putritive and productive. Valuable on wet or clay soils. (About 14 lbs . to the bush.) \(32 \mathrm{c} .1 \mathrm{~b} ., \$ 4.00 \mathrm{bush}\).
Tall Mreadow Oat Grass. (Avena Elatior.) Recommended for soiling, being rapid and luxuriant in its growth. 4 to 5 bush. per acre. (Bush. of 10 lbs.) 25c. lb., \(\$ 2.00\) bush., \(\$ 18.00100 \mathrm{lbs}\).
Iimothy. (Phleum Pratense.) We offer a particularly "choice" sample. \(1 / 2\) bush. per acre. ( 45 lbs . to bush.) \(\$ 2.00 \mathrm{bush} ., \$ 4.45100 \mathrm{lbs}\). Price variable.
Various Leaved Fescue. (Festuca Heterophylla.) 25c. 1b., \(\$ 2.75\) bush. of 14 lbs.
Wood Meadow Grass. (Poa Nemoralis.) Of early growth, and thriving weli under trees. 2 bush. to the acre. (About 14 lbs . to the bush.) \(40 \mathrm{c} .1 \mathrm{~b} ., \$ 5.00 \mathrm{bush}\).
Yellow Oat Grass "True." (Avena Flavescens.) Good for dry pastures and mea-
dows. (About 7 lbs. to the bush.) \(\$ 1.251 \mathrm{~b} ., \$ 8.50\) bush.

Send for our "Farmers' Manual."
It illustrates all the best Grasses, gives full descriptions and much information upon PARM SEEDS of inestimable value to the farmer.

\section*{WINTER WHEAT.}

Prices are subject to the finctuations of the market. The prices herein named are those ruling at this date (Augusi), for the new crop 1899. Inelivery fo, b. New Gork. special quobations to large buyers.

\section*{RURAL NEW YORKER, No. 57.}

Has heavily bearded heads which are beautifully symmetrical, being pointed at the tip, broad in the middle and tapering towards the stem. The straw is unusually tall and strong and stools freely, frequently having 35 to 40 stalks from a single grain. The heads are compact, averaging three kernels to a spikelet or "breast," and ten breasts to a side. The kernels are of medium size and of an attractive color, between the so-called "red" and amber. Possessing the requisite degree of hardness for the production of the finest grade of flour, it will be much sought after by millers. The chaff is clear white, with a trace of velvet sufficient to make it difficult for the green fly to attack it, and the heads do not mildew as the full velvet chaff varieties are liable to do. (See cut.) 75c. peck, \(\$ 2.25\) bushel; 10-bushel lots, \(\$ 2.00\) bushel.

\section*{RURAL \\ NEW YORKER,}

\section*{No. 6.}

This beardless variety is a hybrid between Rye and Armstrong Wheat, though apparently all traces of Rye have disappeared and it now appears. a handsome, beardless Wheat. It succeeds and produces heavy crops on poor thin land. where Wheat could not be successfully or profitably grown, and it also has extreme hardiness to recommend it. When first raised, some years ago, the top of the culms was downy with Rye culms. This characteristic could not be fixed, so that for this variety the culms having no down were alone selected. The gold-colored straw is very thick and strong, easily supporting the heavy grain without breaking. The large amber kernels are placed four to a breast. eight breasts to a side, with long symmetrical heads having a brown chaff. (See cut.) 75 c . peck, \(\$ 2.25\) bushel; 10-bushel lots, \(\$ 2.00\) per bushel.

BURAL
NEW YORKER, NO. 57.

\section*{PEDIGREE GIANT (Half-bearded).}

Those who grew the Early Genesee Giant Wheat which we offered a few years ago will no doubt remember what a grand wheat that was until it ran out. The Pedigree Giant is a cross obtained from the old Genesee Giant, and has in a marked degree all the desirable features of that variety when at its best. The head is of peculiar construction with very full centre row, and the whole head is crowded with fine hard amber grain.

It is a champion in productiveness, and no variety can outyield it. It is a wollder for thrifty fall growth, is early and strong stooling, has strong short-jointed straw, which stands up well under high culture. 75 c . peck, \(\$ 2.25\) bushel ; 10 -bushel lots, \(\$ 2.00\) bushel.

\section*{Jalinter Jnheft-Continued.}

Pride of Genesee (Bearded).-One of the most productive varieties, having a long, well-filled head, and the fact that it will give a reasonably good crop on land so poor that common sorts would be a failure, cannot fail to make it a popular sort, as the head does not decrease in proportion to the straw, being large and well filled on a very short, light growth of straw. 75c. peck, \(\$ 2.25\) bushel; 10-bushel lots, \(\$ 2.00\) bushel.

Diamond Grit, or Winter Saskatchewan (Bearded).-A worthy rival at last to the Hard spring of the Northwest; being superior to every known winter wheat for milling. With this grand seedling in general cultivation the winter wheat sections can compete with the finest grade of flour known, with the advantage of making more flour to the bushel than any other wheat as yet grown. This, with its wonderful productiveness, strong, wiry straw and sturdy growth, with extreme hardiness, cannot fail to make it a leader wherever given a trial. Straw is of medium height, thick-walled and wiry, of a light yellow color. Heads of medium length and carried nearly erect. 75c. peck, \$2.25 bushel; 10-bushel lots, \(\$ 2.00\) bushel.

Fortyfold (Bald). Was first brought to our notice by one of the largest Wheat growers of Pennsylvauia, who claimed it to be the best yielder among all the varieties he has grown. It is of very vigorous growth, remarkably hardy and stands severe winters and dry weather better than any other variety. It has very stiff straw and a large handsome white grain. It does well on all kinds of soll and is therefore a very safe variety to grow. 75 c . peck, \(\$ 2.25\) bushel; 10 -bushel lots, \(\$ 2.00\) bushel.

Bearded Winter Fife.-A grand new bearded Wheat, which has all the splendid milling qualities of the celebrated Winter Fife, and is even hardier and more flinty in the grain. It is one of the earliest wheats, ripening along with the Early Red Clawson, and is a very strong, healthy grower, stooling rapidly in the fall. It starts early in spring, and is among the first to head. Straw is strong and above the medium height. The heads are long and wide, with white velvety chaff. The grain is large, medium long and plump, and of a clear light amber shade. The bran is exceptionally thin, hence it will make more flour than almost any other sort grown. 75c. peck, \(\$ 2.00\) bushel; 10-bushel lots, \(\$ 1.85\) bushel.

Gold Coin (Bald).-A very productive variety which in New York State has yielded over 60 bushels per acre and even on large acreages has seldom run under 40 bushels per acre. The grain is white, the head long and well filled, frequently having five kernels abreast. The straw is strong and stiff, and will not lodge on the richest land. 75c. peck, \(\$ 2.00\) bushel ; 10 -bushel lots, \(\$ 1.85\) bushel.
```

\LHEAT BY NMAIL, POSTPAID.

```

For the benefit of our customers living at a distance from Railroads and Express Offices who would like to try our new. Wheats, we offer them in small lots, postpaid by mail, at the following prices:

\hline
\end{tabular}

Winter.-The stock of Winter Oats we offer is remarkably hardy, having been grown for some years past in Northern Pennsylvania, and are incomparably superior to the ordinary winter or turf oats of Virginia and the South. They are thoroughly acclimated and may be grown even north of New York City with safety. Sown in September they stool out remarkably and require but one and one-hall bushels per acre. They have stiff straw, stand up well and are much more productive than spring oats. In spring if they appear to be frozen out, just wait, the roots are there underneath the surface and grow rapidly when spring really sets in. 50c. peck, \(\$ 1.10\) bushel; 10 bushels and upwards, \(\$ 1.00\) bushel.

\section*{RYE.}

Winter.-The variety most commonly cultivated. \(\$ 1.10\) bushel; 10 -bushel lots, \(\$ 1.00\) bushel.

Excelsior Winter.-A new variety from Vermont, that has never failed to yield at the rate of 40 to 50 bushels per acre. With the originator, a four-acre field jielded 52 bushels to the acre. \(\$ 1.50\) bushel; 10 -bushel lots, \(\$ 1.40\) bushel.

Thousandfold.-Said to be the most productive Rye in cultivation. \(\$ 1.50\) bushel; 10 -bushel lots, \(\$ 1.40\) bushel.

Giant Winter.-Unquestionably the heaviest cropping Rye in existence, having in fair tests outyielded all other varieties both in straw and grain. The heads average six to eight inches in length and are filled from end to end with large, plump, heavy grains. The straw is giant in length and strength and of extraordinary stiffness, resisting severe wind and rain stoms to a remarkable degree without lodging. (See cut.) \$1.75 bushel; 10 -bushel lots, \(\$ 1.60\) bushel.

\title{
SAND, OR WINTER VETCH
}
(Vicia Villosa.)
It is the earliest crop for cutting or plowing under in spring, being nearly a month earlier than Scarlet Clover and much hardier.

\section*{CRIITSON OR SCARLET CLOVER. . .}
(Trifolium incarnatum.)

\author{
The most valuable Plant for Restoring the Fertility of Worn-out Soils.
}

The value of Scarlet Clover is now so thoroughly established that we have no hesitation in recommending that all lands from which crops have heen harvested during the summer and fall should be sown with Scarlet Clover for plowing under the following spring. Authorities who have made a care ful estimate state that plowing under a good crop of Scarlet Clover is equivalent to 20 tons of stable manure per acre, and even if the Clover be harvested or pastured, the benefits derived from the wonderful nitrogenous root formation will alone many times repay the cost of seed and labor.

If intended for feeding, it should always be cut while in the young stage and never fed to stock after the crop has ceased flowering, as serious results are apt to follow the feeding of overripe Crimson Clover.

It is the cheapest source of nitrogen, and has revolutionized the methods of farming in New Jersey, Maryland and Delaware, has restored to profitable cultivation thousands of acres of poor land, and should be extensively used throughout the entire Eastern States for sowing among corn, tomatoes, turnips, etc., at time of last hoeing, or after potatoes, melons, cucumbers, etc., have been harvested or on grain stubble and harrowed in. Its value as a winter soil mulch and for green manuring for orchards cannot be overestimated, as it provides nitrogen in the best form and quantities, where an application of fertilizers or barnyard manure may act too strongly, producing foliage at the expense of fruit.

In the latitude of New York, time for sowing may extend from July 15th to September 15th, and further South up to October. The seed needs to be only lightly covered, and a good plan is to sow on fresh plowing and cover with a light harrow. Sow 15 lbs . per acre.

Ghoics Amerigan-grown new crop seed, thoroughly recleaned and free from weed seeds. 10 c . lb., \(\$ 5.50\) bush., \(\$ 9.00\) per 100 lbs. ing spring crops. lb., \(\$ 4.00\) bushel of \(60 \mathrm{lbs} ., \$ 6.00\) per 100 lbs .

Though it succeeds and produces good crops on poor, sandy soils, it is much more vigorous on good land and grows to a height of 4 to 5 feet. It is perfectly hardy throughout the United States, remaining green all winter, and should be sown during August and September, mixed with Rye, which serves as a support for the plants.

It is exceedingly nutritious and may be fed with safety to all kinds of stock.
It is of such early and rapid growth that a full crop can be taken off in time for plant-
Sow one-half bushel to a bushel per acre with one-half bushel of Rye or Wheat. 10c.

\section*{TRUE DWARF ESSEX RAPE.}

In the United States we have millions of acres of good land that annually lie idle or run to weeds the latter part of the season, after the grain, potato and hay crops have been harvested, a large portion of which might be made to produce one of the finest feeds imaginable and in the greatest abundance, at a time when cattle and sheep are roaming through bare pastures in search of a scanty living. Under favorable conditions it is ready for pasturing sheep or cattle within six weeks from time of sowing, and on an average one acre will carry twelve to fifteen sheep six weeks to two months. When on the rape they should at all times have access to salt; but water is not necessary. There are several varieties of Rape, but care should be taken to procure the Dwarf Essex, which does not seed cure the Dwarf Essex, which does not seed
the same season as sown. In the Northern States it should be sown from Mas to August for fall pasturing, but as it thrives best in cool weather, it should not be sown in the Southern States until September or October for winter pasture. In the latitude of New York, July or August is the best time to sow. Its fattening properties are probably twice as good as those of clover. At the Michigan Experiment Station, 128 lambs were pastured for eight weeks on 15 acres of Rape sown in July, and showed a gain of 2,890 lbs., or at the rate of 3 lbs . per lamb each week. Sow 6 lbs. per acre broadcast, 2 to 3 lbs. per acre in drills. \(10 \mathrm{c} .1 \mathrm{~b} ., \$ 8.00\) per 100 lbs.

\section*{Potting Essentials.}

Leaf Mold, formixing with potting soil.
Rotted Sandy Peat, for lightening potting soil.....
Fibrous Peat, for orchids, ferns etc.
Cocoanut Fibre Refuse, for keeping bulbs in, lightening soil, etc.
Sphagnum Moss, for baskets, drainage, mixing with soil, etc., 5 barrel bale, \(\$ 5.00\)
Charcoal, for sweetening soll, drainuge, etc
Bone Meal, the best artificial fertilizer for mixing with potting soil.

\section*{Henderson's Prepared Potting Soil.}

(1)
NE of the principal elements of success in the growing and flowering of plants and bulbs is proper soil. It is so often difficult for amateurs to procure the right kind of potting soil that we have concluded to furnish it to our customers at practically cost to us, including packing. It will be the same that we use in our extensive greenhouses. It is composed of sod and rotted manure, thoroughly turned and mixed several times during the year it takes to prepare it, when it is considered fit to use. As needed we mix with it peat, sand and pure raw ground bone meal-it is then friable, rich, and will cause plants to grow and bloom luxuriantly.

PRICE, 25c. per peck bag, 75c. per bushel bag, \(\$ 2.00\) per barrel (purchaser to pay freight).

\section*{** HYACINTH GLASSES. \(⿻ 心\).}

Hyacinths grown in glasses of water are charming ornaments for parlor windows, and the ease and success in flowering bulbs in this way add greatly to their popularity. Polyanthus Narcissus, Amaryllis Formosissima and a few other bulbs can be grown in the same manner.

TYE'S PLAIN.
Vernal Eyacinth Vase. Made of terra cotta. Immerse the vase for a day in water, then sprinkle it with Timothy seed; within a few days' time will cover the vase with a bright green growth; of course, always keep the vase filled with water. Hyacinths can be grown in these just the same as in the regular Hyacinth glasses. Price, 30c. each, \(\$ 3.00\) per doz. 1 oz. Timothy seed, 10 c .
"Twisted" Tye's Eyacinth Glass. Highly attractive. Furnished in the following colors: green, purple, blue, opal or crystal. 25 c each, \(\$ 2.50\) per doz
Plain Tye's Eyacinth Glass. Furnished in the following colors: green, purple, blue, opal or crystal. 20c. each, \(\$ 2.00\) per doz.

\section*{CHINESE Sacred Bily BOWLS.}

As used by the Celestials for growing their famous "Joss Flower" In. (See page 22.) The bulbs should be surrounded with pebbles to keep them from toppling over when in flower, and then water enough put in to cover about one-half of the bulb; place them in a dark, conl closet for a couple of weeks to become rooted, and then bring into the light.

\section*{Tokic Chinese Lily Bowls.}

China, handsomely decorated in curious Japanese designs. 7 -inch, for 1 bulb 9 * 3 or 4 bulbs

Roman Hyacinth Pot.
Price, \(\$ 1.00\) each. (Requires 18 Bulbs.)

Glass Chinese Lily Bowl.
\begin{tabular}{r|rl}
.\(\$ 0.40\) & 6 -inch diameter, for \(\frac{1}{1}\) bulb, \(\$ 0.25\) \\
.60 & \(71 / 2\)
\end{tabular}

Patent Fyacinth Glass. This is in two parts; the inner contains the bulb and roots and can be removed without injuring them, to refill with water. 25 c . each, \(\$ 2.50\) doz.
Tall "Twisted" Eyacinth Glasses. Very ornamental. Furnished in the following colors: green, purple, blue, opal or crystal. Price, 20 c . each, \(\$ 2.00\) per doz
Plain Tall Hyacinth Glass. Furnished in
 the following colors: green, purple, blue, opal or crystal. 15c. each, \$1.50 per doz.

\section*{ROSE BOWLS AND VASES.}

For Cut Flowers.

Fine imitation cut glass; very artistic for holding loose bunches of roses and cut flowers. Price, 50c.

HANGIVG FLOTER HOLDER. TOKONABI TASE.
Hanging Japanese Flower Holder. When filled with roses or other cut flowers, is a very novel ornament. They are of the finest Japanese porcelain. Blue design on white ground, 8-in., 50 c . 10 -in. 75 c
Tokonabi Flower Vase. Very hard and exquisitely finished and shaded terra cotta, with clouds, dragons and borders in raised relief. First size, \(12 \times 5\) in., \(\$ 1.00\). Second size, \(91 / 2 \times 4\) in., 75 c . Third size, \(5 \times 21 / 4\) in., 30 c . Fourth size, \(41 / 2 \times 11 / 2\) in., 20 c .

\section*{NOVELTIES in which to grow BULBS.}

Interesting and beautiful objects for the wiodow garden may be produced by growing Crocus, Lily of the Valley and Roman Hyacinths in the ornamental pots here illustrated, which are pierced with holes, out of which the leaves and flowers grow; the bulbs are placed inside with the crown in the holes; soil is then filled in compactly, which holds the bulbs in place; soak thoroughly with water, place in a dark, cool cellar, or plunge in the ground out-of-doors for a few weeks, to allow the bulbs to root thoroughly. Never allow them to suffer for water.

Bee Hive Crocus Pot. Price, 80 c .
(Requires 36 Crocus.)

Hedgehog Crocus Pot.
Price, 80 c . (Requires 27 Crocus.)

Lily of the Valley Pot.
(Rough Finish.)
Price, 30c. each, \(\$ 3.00\) per doz. (Requires 35 Single Crowns.)

"Fashion" Fern Dish. Prices include inside pan.

\section*{HENDERSON'S BURLAP MATS.}

These are made of strong burlap bagging, warmly lined with waste wool and cotton, which is quilted in to hold position.: They are excellent substitutes for straw mats, being, if anything, warmer than straw, more easily handled, less bulky, and they do not harbor mice or other vermin. We were afraid that they would hold moisture and either rot or mildew, but our trial for two winters proves them to be far more durable than straw mats. PRICES: Size A, \(40 \times 76\) ins., 80 c . each, \(\$ 9.00\) per doz.; Size B, \(76 \times 76\) ins.', \(\$ 1.15\) each, \(\$ 12.00\) per doz.

\section*{"WATERPROOFED DUCK" MATS.}

These are filled with cotton and wool waste, and quillted the same as the "Burlap" mats described above. The "waterproofed duck" cotton eloth on one side sheds water, and prevents them from getting "soaked through." PRICES: Size C, \(40 \times 76\) ins., \(\$ 1.25\) each,\$12.00 per doz.; Size \(\mathbf{D}, 76 \times 76\) ins., \(\$ 1.75\) each, \(\$ 18.00\) per doz.

\section*{RYE STRAW MATS.}

Being made in the best manner of long rye straw and best tarred cord, they are invaluable for throwing over cold irames, hot beds, etc. during the coldest weather ; they roll up and can be stowed in small space. PRTCES: Size, \(3 \times 6\) feet, \(\$ 1.00\) each, \(\$ 11.00\) per doz.; Size, \(6 \times 6\) feet, \(\$ 1.75\) each, \(\$ 20.00\) per doz.

\section*{MASTICA.}

For glazing Greenhouses, Sashes, etc., new and old. It is elastic, adhesive and easil \(l_{\text {r }}\) applied, It is not affected by dampness, heat or cold.

Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead) for glazing that is satisfactory for any length of time. The fact is, putty is not adapted for greenhouse work.
 is of great valueingoing over ola houses with a Mastica machine on the outside of sash, as it makes it perfectly tight and saves the expense of relaying the glass. One gallon is sufficient for about 300 lineal feet, used either for bedding or over glazing. PRICPS for Mastica, soft, for machine application, 40c. per quart, 75 c . per \(1 / 2\) gallon, \(\$ 1.35\) per gallon. Mastica Glazing Machine, \(\$ 1.15\) each.

\section*{PATENT PROTECTING CLOTH.}

Specially prepared to prevent mildewing and rotting; valuable for protecting plants from frost, covering hot beds and frames in spring, in lieu of glass, for Chrysanthemum houses, for covering tender

COLD FRAME WITH PROTECTING CLOTH IN LIEU
of glass.

\section*{PRICES:}

TEMPORARX CHRYBANTHEMCM HOUSE OF PROTECTING CLOTH. bedding plants at night when there is danger of frost, therehy lengthening the display etc., at one-tenth the cost of glass. It comes in yard widths.

\section*{MARKET GARDENERS' AND FLORISTS' SASH.}

We carry a large stock, so that we can fill almost any order on receipt. Unglazed: \(3 \times 6\) feet, for \(6 \times 8\) inch glass, of best cypress, 80 c. each, \(\$ 9.00\) per doz., \(\$ 70.00\) per 100 . This is the regulation sash for hot beds and cold irames, and we sell thousands of them every year.

\section*{EXTRA FINE SASH FOR PRIVATE PLACES.}

Made from "red gulf" cypress, finished edges, with neat iron crosspiece running through the centre; painted one coat.
Unglazed: \(3 \times 6\) feet, requiring three rows of \(8 \times 10\)-inch glass, \(\$ 1.25\) each, \(\$ 14.00\) per doz. Glazed: \(3 \times 6\) feet, with three rows of \(8 \times 10\) inch glass, painted two coats white, \(\$ 3.00\) each, \(\$ 35.00\) per doz.
For shipping, glazed sash has to be carefully crated. This will cost extra, 50 c. per crate. Up to 6, glazed sash can be put in a crate.

\section*{COLD FRAMES AND HOT BEDS.}

Made of best cypress lumber, planed and painted two coats. The corners join by bolting on angle irons. The rails between the sash are rabbeted for the sash, grooved for drip and dove-talled into the sides. Strong, durable and portable. Can be taken down for convenient storage when not in use; 8 inches deep in front, 16 inches deep at back.

Prices do not include sash (for prices of sash, see above).

No. C, "four "، "............................................................. 10.50

\section*{DEEP COLD PITS.}

For wintering bulbs, carnations, dormant roses, etc.
Above ground they are the same as the hot-bed frames offered above, and, in addition, have posts and 2 -inch lumber for siding up the excavation, 18 inches below the surface.

Prices do not include sash (for prices of sash, see above).
No. E, For two \(3 \times 6\) feet sash.

\section*{VAN REYPER'S "PERFECT" GLAZING POINTS.}

The finest glazing points on the market These are made of steel wire and galvanized, having double points, and lap over the glass in such a manner as to positirely keep it from slipping. They may be used on either side of the sash bar, thus prerenting the annorance of rights and lefts.

PRICES:
Per 65 c .
Pinc

VAN REYPER's g LAZing point.

\section*{RUBBER PLANT SPRINKLERS.}

Indispensable article for sprinkling cut flowers, seedlings, clothes, etc. A pressure on the bulb ejects the water in a fine spray.

\section*{PRICPS:}

Straight neck, 6-oz. size, \(45 c\).; 8 -oz. size, 55c.; 10 -oz. size, 65 c .
Angle neck, 6-0z, size, 50c. 8-oz. size, \(65 \mathrm{c} . ; 10-\mathrm{oz}\). size, 75 c.

\section*{(Postage, 10c. each extra.)}

\section*{RUBBER PUTTY BULBS.}

An excellent article for glazing. A pressure with the hand ejects the putty prepared as per directions accompanying each, and by running it along the sash bars the work is done quickly. Price, \(\$ 1.00\) each; by mail, \$1.10 each.

Fureka Fumigator.

\section*{Greenhouse Fumigators}

For Smoking Plants.

\section*{EUREKA FUMIGATORS.}

For fumigating greenhouses with dampened tobacco stems; made of galvanized sheet iron; adamper regulates the तrait; no danger of fire; no ashes or litter. No. 1, 12 ins. high, \(\$ 1.50\); No. 2, 16 ins. high, 1.75 ; No. 3, 20 ins. high, \(\$ 2.00\); No. 4 , 24 ins, high, \(\$ 2.75\).

\section*{Perfection Fumigators.}

\section*{Make Moist Smoke.}

This fumigator will last for years; it has a water tank
between the fire and the outside, preventing burning out The tank should be filled with vapor arigesand mixes with the dry smoke from stems, producing a dampened smoke more dense and less injurious to delicate foliage than from any other fumigator made. Outside fumigating can also be done with the Perfection; the cast-iron lid is made so a hose can be attached, and all the outlets for the smoke (except through the hose) can be closed off. No. 1 holds one peck of stems, \(\$ 3.00\); No. 2 holds half bushel of stems, \(\$ 3.75\); No. 3 holds threequarters bushel of stems, \(\$ 4.50\).

\section*{BRASS SYRINGES.}

Thesesyringes are applicable for all horticultural purposes in servatory and garden. They are fitted with caps or roses for ejecting water in one stream, or dispersingit in a fine or coarse spray as required. Specially adapted for applying fluid insecticides.

No. A. Length of barrel, 12 in.; diameter, 1 in.; 1 spray and 1 stream rose, \$2. No. 2. Barrel, 14 in. long; diam., 1 5-16 in.; 1 coarse and 1 fine spray ad stream rose, \(\$ 3.50\). No. 10. Barrel, 18 in. long; diam., 11/2 in. 1 coarse and 1 fine spray and 1 stream rose with patent vaives, and with elbow joint for sprinkling under the foliage, \(\$ 5.50\).

No. 11. Same as No. 10, without patent valves, with elbow joint, \(\$ 4.50\).
No. G. Barrel, 16 in. x \(11 / 2\) in. diameter; 1 spray and 1 stream ling under foliage, \$4. NO. F. Barrel, 16 in. X \(11 / 2\) in., sheet brass, 1 stream rose, \(\$ 2.25\).

Perfection Fumigator.

\section*{Woodason's Fluid and Powder Bellows}

\author{
are not the cheapest, but are thoroughly good and made for
} wear.

\section*{WOODASON'S DOUBLE CONE POWDER BELLOWS.}

For Dusting Plants with Dry Powders for lnsects and Fungus.
This bellows can be held in any direction without wasting powder, as it regulates its own supply, and it does not clog up. The best article ever invented for destroying insects in the conservatory, garden, orchard or field; it will kill every bug upon one acre of potatoes, under the leaves as well as on top, in an hour. (See cut.) Price, \$2.75.
WOODASON'S SINGLE CONE POWDER BELLOWS.
Price, Jarge size, \$1.75. Small size (for conservatory and house use), \(\$ 1.00\).

\section*{WOODASON'S FLUID VAPORIZING BELLOWS.}

For Spraying Plants with Fluid Decoctions for Insects and Fungus.

The "Henderson' Hand Bucket Pump.

This throws a spray as fine as mist, rendering the use of strong solutions perfectly safe on tender foliaged plants; it forces the fluids into every crevice, without using half the quantity required by syringe or sprinkler. (See cut.) Price, large size, \(\$ 2.00\). Small size (for house use), \(\$ 1.25\)

\section*{THE "HENDERSON"}

\section*{HAND BUCKET PUMP.}

This is the best and most durable portable hand pump in the market. Working parte are made of solid brass with large air chamber, and is double acting, throwing an absolutely continuous stream, either solid or in a fine spray, as desired; very light and easily carried, and works from any bucket or tub. Just the thing for throwing liquid insecticides and fungicides on low trees, shrubs, plants, etc., and by altering the nozzle it can be used for washing carriages, windows, etc. (See cut.) Price, \(\$ 3.50\); or, with extra' 7 feet section of hose and pole connection for tree spraying, \(\$ 4.50\).

\section*{HENDERSON'S SUPERIOR FERTILIZER FOR HOUSE PLANTS.}

A safe, clean and high-grade fertilizer, free from disagreeable odor, prepared especially for feeding plants grown in pots. It is a wonderfulinvigorator, producing luxuriant, healthy growth, foliage of rich texture and larger and more brilliant flowers of improved substance. It contains in a highly concentrated.form all of the ingredients of plant food essential to the highest development of plants and flowers. It is very soluble and is readily assimilated, so that marked improvement is usually noticed in ten days' time It is fine and dry, clean and easy to apply, either sprinkled over the surface of the soil as a top-dressing, or dissolved in water (stirring well). Detailed directions oneach package

For Cut Flowers, a pinch of this fertilizer in the water will keep it sweet and wholesome, and preserve the flowers from one to three days longer, if half an inch of the stems is cut off daily, which removes the callus which forms over the cut ends and allows the flower above to absorb the invigorating liquid.

Price, 1 1b. package, sufficient for 25 ordinary sized plants for 1 year, 20c., or prepaid, 35c.

Delivered Free in the \(U\). S. at these prices by
Peter Henderson \& Co., New York.

The Langusge of Flowers. By J. LvGRaHay. Includes foral poetry.

By PETER HENDERSON. 375 Pages. Fully Illustrated. Price, post=paid, \$1.50. TF you wish to grow Vegetables for Sale, read Gardening for Profit. The personal success of its author during his long career as a market gardener, and the success of thousands from the time he first made his cultural methods known up to the present day, shows the popular estimation of the value set upon this great work. All over the land it opened up the market gardening interest, for it should be always remembered that this was the first work ever written on market gardening in this country. To the South alone its value is almost beyond computation, for the enormous trucking interests already there, and which are constantly on the increaseowe their birth entirely to, and subsequent development mainly to the teachings of Gardening for Profit. Written particularly for the Market Gardener and Truck Farmer, yet it is of equal value for large private gardens. The first edition of Gardening for Profit was published in 1866 ; it has been revised twice since, and its sale has been so large that up to this time 43 editions hare been printed. The present edition was revised and greatly enlarged in the summer of 1886 . Its scope has been greatly extended since the earlier editions were published, The varieties in vegetables recommended for market culture have also been carefully revised; so that what is now advised to plant are kinds in general use at this time.

\section*{RRSTICATIORICUTURE}

By PETER HENDERS0N. 325 Pages. Fully Illustrated. Price, post-paid, \$1.50.

\(I\)F you wish to become a Commercial Florist, then of all books you should procure
Practical Floriculture. We have any number of complimentary letters from people
who actually knew nothing of the florists' business, but who followed the instructions in this work and are now "full-fledged florists." And although written especially for the Commercial Florist, it is equally valuable to the amateur and all having conservatories, greenhouses, window gardens, etc. Practical Floricclture was first issued in 1868, has gone through many editions and had an enormous sale, and is admitted to be the leading American authority on this subject. This present edition of Practical Floriculture was greatly enlarged by Mr. Henderson in 1887, and revised to keep abreast of the times, as there are now many superior methods of propagation and culture of flowers and plants-and many improved varieties of plants-all of which have been fully treated in this new edition.
 OONTMNNTS. \(\qquad\)
How to become a Florist-The Profits of Floriculture-Aspect and Soil-The Preparation for New and the Renovation of Old Lawne- Laving out the Flower Flower Beds-Soils for Potting - Temperature and Moisture - The Potting of Plants-Drainage in Pots-Cold Frames for Winter Protection-Construction of Hot-Beds-Greenhouse Structures-Glass, Glazing and Shading-Modes of Heat-
ing-Propagation of Plants by Seeds-Propagation of Plants by Cuttings-Prop-

Window Gardening - Formation of Rock-work and Plants for Rocks-What Flowers will grow in the Shade-Succession Crops in the Greenhouse-Packing Plants-Plants by Mail-Insects and Diseases Affecting Plants-Mildew-Diary of Operations for the Year-The Culture of Foreign Grape Vines under Glass.

By PETER HENDERSON. 526 Pages. Profusely Illustrated. Price, post-paid, \$3.00.

THE original Handbook of Plants was issued in 1881 ; in thls new edition, rewritten and enlarged, issued 1890, all the new genera of importance are added. All botanical terms are given, and also a very full list of popular names, and all the generic names are accentuated. The natural syatem of arrangement is adopted in the descriptions instead of the Linnzan or artificial system; and a carefully compiled glossary of the technical terms used in describing plants. A monthly calendar of operations for the greenhouse and window garden, flower, fruit and kitchen garden, will undoubtedly render this edition valuable as a book of reference. Very full instructions are given for the culture and forcing of all Fruits, Flowers and Vegetables of importance; in short, there is sufficient matter given on all gardening subjects to allow this book to be termed The American Gardener's Dictionary. And it will be better adapted to the wants of A merican horticulturists than any of the more costly foreign works on gardening; for, though from a foreign standpoint these are all they claim to be, yet for our American climate much of the information, and especially the gardening instructions, are not only useless, but actually misleading.

OONTENTTS.

About 5,000 genera of plants, alphabetically arranged, with their descriptions, individusl histories, usefulness, hardiness, requirements, etc., and, where their importance justifies it, cultural instructions are given-Local, Popular or Common Names - Correct Pronumciation-Cultivation of principal Vegetables, Fruits and Flowers-Winter Forcing of Roses, Bulbs and other Plants used for Cut Flowers-Winter
Garden Operations.
Annuals, Bedding and Borders, Bouquets, Budding, Cold Frames and Pits, Color in Flowers, Conservatory, Designs, Draining, Fertilizers, Fountains, Frozer Plants, Glass and Glazing, Grafting, Grasses, Greenhouse, Hanging Basketr Heating, Hedges, Herbaceous Plants, Herbarium, Hybridization, In-
